Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1200 O.G. 98, on July 29, 1997.

For use of the European Patent Office as an International Searching Authority for international applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52, on September 28, 1982.

For use of the European Patent Office as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office, see the notices appearing in the *Official Gazette* at 1080 O.G. 2, on July 7, 1987, and at 1091 O.G. 2, on June 7, 1988. There is no longer a limit on the number of such international applications accepted for international preliminary examination by the European Patent Office; see the notice appearing at 1116 O.G. 32, on July 17, 1990.

The search fee of the European Patent Office was decreased, effective October 1, 1997, and was announced in the *Official Gazette* at 1202 O.G. 47, on September 16, 1997.

International fees were changed, effective on May 1, 1997, due to a change in the exchange rate of the U.S. dollar with regard to the Swiss franc, and were announced in the *Official Gazette* at 1197 O.G. 69, on April 22, 1997.

Certain domestic PCT fees and charges for International Search and Preliminary Examination were changed, effective October 1, 1997, and were announced in the *Official Gazette* at 1201 O.G. 63, on August 19, 1997.

The schedule of PCT fees (in U.S. dollars), effective October 1, 1997, is as follows:

Notice of Maintenance Fees Payable

Title 37 Code of Federal Regulations (CFR), Section 1.362(d) provides that maintenance fees may be paid without surcharge for the six-month period beginning 3, 7, and 11 years after the date of issue of patents based on applications filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(h), as amended effective Dec. 16, 1991. If the maintenance fee is not paid in the patent requiring such payment the patent will expire on the 4th, 8th, or 12th anniversary of the grant.

Attention is drawn to the patents which were issued on October 11, 1994 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 5,353,437 through 5,355,534
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on October 9, 1990 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,961,232 through 4,962,545
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on October 7, 1986 for which maintenance fees due at 11 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,615,046 through 4,616,364
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

For patents based on applications filed on or after Dec. 12, 1980, but before Aug. 27, 1982, patent owners must establish small entity status according to 37 CFR 1.27 if they have not done so and if they wish to pay the small entity amount.

The current amounts of the maintenance fees due at 3 years and six months, 7 years and six months, and 11 years and six months are set forth in 37 CFR 1.20(e)-(g), as amended Oct. 1, 1997, which are reproduced below:

37 CFR § 1.20 Post-issuance fees

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§ 1.9(f)) $525.00
By other than a small entity $1,050.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§ 1.9(f)) $1,050.00
By other than a small entity $2,100.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on applications filed on or after Dec. 12, 1980 in force beyond 12 years; the fee is due by eleven years and six months after the original grant:

By a small entity (§ 1.9(f)) $1,580.00
By other than a small entity $3,160.00

The amount of the surcharge for paying the maintenance fee during the grace period or after expiration of the patent are set forth in 37 CFR 1.20(h), and (i) which are reproduced below:

(h) Surcharge for paying a maintenance fee during the 6 month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980:

By a small entity (§ 1.9(f)) $65.00
By other than a small entity $130.00

(i) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been:

(1) unavoidable $700.00
(2) unintentional $1,640.00

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fee

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Notice of Expiration of Trademark Registrations Due To Failure to Renew

15 U.S.C. 1059 provides that each trademark registration may be renewed for periods of ten years from the end of the expiring period upon payment of the prescribed fee and the filing of an acceptable application for renewal. This may be done at any time within six months before the expiration of the period for which the registration was issued or renewed, or it may be done within three months after such expiration on payment of an additional fee.

According to the records of the Office, the trademark registrations listed below are expired due to failure to renew in accordance with 15 U.S.C. 1059.

Performance Review Board

Agency: Department of Commerce
Patent and Trademark Office

Action: Announcement of Membership of the Patent and Trademark Office Performance Review Board.

Summary: In conformance with the Civil Service Reform Act of 1978, 5 U.S.C. 4314(c)(4), the Patent and Trademark Office announces the appointment of persons to serve as members of its Performance Review Board.

Address: Comments should be addressed to Director, Office of Human Resources, Patent and Trademark Office, One Crystal Park, Suite 707, Washington, DC 20231.

For Further Information Contact: Alethea Long-Green at the above address or telephone (703) 305-8062.

Supplementary Information: The new membership of the Patent and Trademark Office Performance Review Board is as follows:

Gloria Gutierrez, Chairman
Acting Deputy Associate Commissioner for
Administration and Quality Services
Patent and Trademark Office
Washington, DC 20231
Term - expires September 30, 1999

Mary C. Lee
Deputy Director, Patent Examining Group

Status of Certification Services

On November 28, 1995, the Office published an Official Gazette Notice entitled "Temporary Suspension of At Cost Services for Orders for Certified Copies" (1180 OG 121) to advise practitioners and the public of delays in filling orders for certified copies of PTO documents. This is an update of actual days to mail for orders filled during the month of August 1997:

Certified Product	Goal	Actual Calendar Days to Mail
Patent Application-As-Filed, Expedited	7	6
Patent Application-As-Filed, Regular	17	16
Patent Related File Wrapper	25	36*
Patent Copy	10	5
Patent Assignments	10	5
Trademark Application-As-Filed, Expedited	7	3
Trademark Application-As-Filed, Regular	17	8
Trademark Related File Wrapper	25	12
Trademark Assignments	10	6
Trademark Registration, Expedited	5	3
Trademark Registration, Regular	14	7

* Includes turnaround times for files on official search and file reconstruction.

Due to varying availability of media, customers will not be advised when orders are not delivered within the published goal periods. However, customers will be advised if any unexpected delay in their order has been identified. Customers should use the above actual days to mail for each product as a guide as to when they can expect their orders. In determining expected delivery times, the day an order is received in the Office is calculated as "day zero." The next business day is "day one."

Delivery of any specific copy will vary based on the availability of scanned images, microfilm products, and/or file accessibility. On June 10, 1997, the Office published an Official Gazette Notice entitled "Changes in Practice in Supplying Certified Copies and Filing Receipts" (1199 OG 39) which advised customers who placed orders for certified copies of patent applications-as-filed not to request them until the official filing receipt is received; images and related bibliographic data are not available to Certification Division until the filing receipt is generated by the Office of Initial Patent Examination.
Customers are encouraged to fax orders for copies directly to Certification Division at (703) 308-9759 and to pay by PTO Deposit Account, MasterCard, or Visa. Information on the status of pending orders may be obtained by calling (703) 308-9726 or 1 (800) 972-6382 (outside the Washington, DC Metro area), or via E-mail: certdiv@uspto.gov.

Patent and Trademark Office

Notice of Public Hearing and Request for Comments on Procedures for Recording Patent Prosecution File Histories.

Agency: Patent and Trademark Office, Commerce.

Action: Notice of Hearing and Request for Public Comments.

Summary: Recent decisions by the United States Supreme Court and the United States Court of Appeals for the Federal Circuit highlight the crucial role a prosecution history plays in determining the validity and scope of a patent. *See, e.g., Warner-Jenkinson Co. v. Hilton Davis Chem. Co.*, 117 S. Ct. 1040, 41 USPQ2d 1865 (1997); *Markman v. Westview Instruments*, 52 F.3d 967, 34 USPQ2d 1321 (Fed. Cir. 1995), *aff'd* 116 S. Ct. 1384, 38 USPQ2d 1461 (1996); *Vitronics Corp. v. Conceptronic Inc.*, 90 F.3d 1576, 39 USPQ2d 1573 (Fed. Cir. 1996). In response, the United States Patent and Trademark Office (PTO) requests public comments on issues associated with procedures for recording complete and accurate patent prosecution history records. Interested members of the public are invited to testify at the hearing and to present written comments on any of the topics outlined in the supplementary information section of this notice.

Dates: A public hearing will be held on November 18, starting at 9:00 a.m. and ending no later than 5:00 p.m. If sufficient interest warrants, an additional public hearing will be held in

an alternate location, for example, in California, or by televideo conference.

Those wishing to present oral testimony at the hearing must request an opportunity to do so no later than November 3, 1997.

To ensure consideration, written comments must be received at the PTO no later than November 18, 1997. Written comments and transcripts of the hearing will be available for public inspection on or about December 1, 1997.

Addresses: The November 18, 1997 hearing will be held in the Commissioner's Conference Room located in Crystal Park Two, Room 912, 2121 Crystal Drive, Arlington, Virginia. Those interested in testifying or in submitting written comments on the topics presented in the supplementary information, or any other related topics, should send their request or written comments to the attention of Mary Critharis addressed to Commissioner of Patents and Trademarks, Box 4, Patent and Trademark Office, Washington, D.C. 20231; or John M. Whealan addressed to Office of the Solicitor, Box 15667, Arlington, Va. 22215. Written comments may be submitted by facsimile transmission to Mary Critharis at (703) 305-8885 or John M. Whealan at (703) 305-9373. Comments may also be submitted by electronic mail through the Internet to mary.critharis@uspto.gov or john.whealan@uspto.gov. Written comments will be maintained for public inspection in Crystal Park Two, Room 902, 2121 Crystal Drive, Arlington, Virginia. Written comments in electronic form may be made available via the PTO's World Wide Web site at http://www.uspto.gov. No requests for presenting oral testimony will be accepted through electronic mail.

For Further Information Contact: Mary Critharis by telephone at (703) 305-9300, by facsimile at (703) 305-8885, by electronic mail at mary.critharis@uspto.gov, or by mail addressed to Commissioner of Patents and Trademarks, Box 4, Washington, D.C. 20231; or John M. Whealan by telephone at (703) 305-9035, by facsimile at (703) 305-9373, by electronic mail at john.whealan@uspto.gov, or by mail addressed to Office of the Solicitor, Box 15667, Arlington, Va. 22215.

I. Background

The official record detailing the prosecution of a patent application in the United States Patent and Trademark Office (PTO) is more than just a historical record. During the life of a patent, the prosecution record defines the scope of the claimed invention and the patent owner's rights. Thus, the written record must clearly explain the rationale for decisions made during the examination of a patent application, including the basis for the grant. Moreover, once a patent has been granted, the official record will be closely scrutinized by potential licensees, competitors who must avoid infringing the claimed invention, or even those attempting to invalidate the patent. In the event of litigation, the record will serve as a primary basis for court determinations of issues regarding the validity or scope of the patent.

The written record created during the prosecution of a patent application, commonly referred to as the "file wrapper" or "file history," consists of all correspondence between an applicant and the PTO. The file history typically consists of the patent application as originally filed, the cited prior art, all papers prepared by the examiner during the course of examination, and documents submitted by the applicant in response to the various requirements, objections, and rejections made by the examiner. In addition, the file history should contain a written record of all oral communications addressing patentability issues between the examiner and applicant. Examiners and applicants share the responsibility for the clarity, accuracy, and completeness of the file wrapper.

Recent decisions by the United States Supreme Court and the United States Court of Appeals for the Federal Circuit emphasize the importance of clear and complete prosecution histories in that they will look more closely at and place greater weight on patent prosecution histories. *See, e.g., Warner-Jenkinson Co. v. Hilton Davis Chem. Co.*, 117 S. Ct. 1040, 41 USPQ2d 1865 (1997); *Markman v. Westview Instruments*, 52 F.3d 967, 34 USPQ2d 1321 (Fed. Cir. 1995), *aff'd*, 116 S. Ct.1384, 38 USPQ2d 1461 (1996); *Vitronics Corp. v. Conceptronic Inc.*, 90 F.3d 1576, 39 USPQ2d 1573 (Fed. Cir. 1996). For example, in *Warner-Jenkinson*, the Supreme Court explained the importance of the prosecution history of a patent in determining infringement under the doctrine of equivalents. 117 S. Ct. at 1049-51, 41 USPQ2d at 1871-73. Specifically, the Court acknowledged that when the prosecution history reveals that a patent owner amended the claims by adding limitations to overcome the prior art, the patent owner will be estopped from alleging infringement under the doctrine of equivalents as to that amended limitation. *Id.* at 1051, 41 USPQ2d at 1873. Subsequently, the Court held:

> Mindful that claims do indeed serve both a definitional and a notice function, we think the better rule is to place the burden on the patentholder to establish the reason for an amendment required during patent prosecution .... Where no explanation is established, however, the court should presume that the PTO had a substantial reason related to patentability for including the limiting element added by amendment.

Id. The emphasis on the written record, including the prosecution history, to interpret the claims is further illustrated by the *Markman* and *Vitronics* decisions. In *Markman*, the Federal Circuit held claim interpretation is a question of law to be determined by the court based on three sources: the claims, the specification, and the prosecution history. 52 F.3d at 979, 34 USPQ2d at 1329. Along the same lines, the Federal Circuit in *Vitronics* opined that intrinsic evidence, which includes the claims, the specification, and the prosecution history, is the "most significant source" of evidence to be used when interpreting claims. 90 F.3d at 1582, 39 USPQ2d at 1576. In explaining that the claims, the specification, and the prosecution history make up the "public record" upon which the public is entitled to rely, the Federal Circuit stated:

> [T]he [prosecution] history contains the complete record of all the proceedings before the Patent and Trademark Office, including any express representations made by the applicant regarding the scope of the claims. As such, the record before the Patent and Trademark Office is often of critical significance in determining the meaning of the claims.

90 F.3d at 1582, 39 USPQ2d at 1577. The Federal Circuit held that when the public record "unambiguously describes the scope of the patented invention," reliance on extrinsic evidence such as expert testimony is improper. 90 F.3d at 1583, 39 USPQ2d at 1477.

The PTO imposes written recording requirements on both the examiner and applicant. These requirements are designed to furnish the patent applicant, as well as the public and the courts, with sufficient information to make informed decisions. As the agency charged with granting valid patents, the PTO is actively concerned with the development of clear and complete prosecution histories. For this reason, the PTO is interested in obtaining public opinion as to whether the current rules and procedures pertaining to recording prosecution histories are sufficient to provide complete and clear records.

II. Issues for Public Comment

Interested members of the public are invited to testify and present written comments on issues they believe to be relevant to the discussion below. Questions following the discussion are included to identify specific issues upon which the PTO is interested in obtaining public opinion.

A. Current Procedures for Recording Patent Prosecution Histories

The emphasis on preparing complete, clear, and accurate file histories is prevalent throughout the patent rules which form title 37 of the Code of Federal Regulations (C.F.R.) and the guidelines of practice embodied in the Manual of Patent Examining Procedure (M.P.E.P.). Recognizing the importance of the written prosecution record, PTO rules and procedures stress the need for examiners to communicate clearly the basis for all rejections and objections so that the issues can be identified early and the applicant can be given an opportunity to respond. *See* 37 C.F.R. 1.105 (1996); M.P.E.P. 707.07 (6th ed. 1995, rev. 2, July 1996). To meet this goal, Rule 105 explicitly states

that "[t]he examiner's action will be complete as to all matters." 37 C.F.R. 1.105. This requires the examiner to treat all claims on their merits, provide authority and support for each ground of rejection, and respond to all arguments and points raised by applicants.

The M.P.E.P. instructs examiners to provide clear and complete Office actions throughout the examination process. For instance, when making rejections such as lack of an adequate written description, the examiner's position should be fully developed and contain detailed reasons rather than a mere conclusion. *See* M.P.E.P. 706.03 (6th ed. 1995, rev. 2, July 1996). Moreover, upon entering an obviousness rejection under 35 U.S.C. 103, the examiner should set forth in the Office action the relevant teachings of the prior art relied upon, the differences between the claimed invention and the applied references, and an explanation as to why the claimed invention would have been obvious to one of ordinary skill in the art. M.P.E.P. 706.02(j) (6th ed. 1995, rev. 2, July 1996). Furthermore, in making a final rejection, all outstanding grounds of rejection should be fully developed and clearly set forth to the extent that the remaining issues are readily apparent. M.P.E.P. 706.07 (6th ed.. 1995, rev. 2, July 1996).

Concurrent with the examiner's duty to provide clear and fully developed Office actions, Rule 111 mandates an applicant's response to be complete in order to promote an early and full determination of the issues. 37 C.F.R. 1.111 (1996). Current procedure requires that the response by the patent applicant "must distinctly and specifically point out the supposed errors in the examiner's action and must respond to every ground of objection and rejection in the prior Office action." 37 C.F.R. 1.111. Moreover, the requirements of Rule 111 dictate that applicants clearly point out the patentable novelty believed to render the subject claims allowable over the referenced teachings. 37 C.F.R. 1.111. *See* M.P.E.P. 714.02 (6th ed. 1995, rev. 2, July 1996). Furthermore, to ensure a clear and complete file record, examiners are given the authority to require correction if a response is not complete. *See* M.P.E.P. 714.03 (6th ed. 1995, rev. 2, July 1996). In limited situations, an examiner is authorized to make changes directly to the written portions of the filed application to correct obvious errors such as spelling and minor grammatical errors. M.P.E.P. 1302.04 (6th ed. 1995, rev. 2, July 1996). Other obvious informalities such as changes to the abstract may be corrected by a formal examiner's amendment which is placed in the file wrapper and a copy is mailed to applicants. *Id.* Amendment or cancellation of claims by formal examiner's amendment is permitted when passing an application to issue provided that the changes have been authorized by applicant or applicant's representative. *Id.*

A complete prosecution history should clearly reflect the reasons why the patent application was allowed. According to Rule 109, an examiner may set forth reasons for allowance when the record, as a whole, is unclear as to why the application is allowable over the prior art. 37 C.F.R. 1. 109 (1996). Thus, the examiner must make a judgment of the record to determine whether reasons for allowance should be set out in that record. However, the M.P.E.P. cautions examiners to exercise great care in recording reasons for allowance so as not to misconstrue the claims. M.P.E.P. 1302.14 (6th ed. 1995, rev. 2, July 1996). If desired, an applicant may comment on an examiner's statement of reasons for allowance. Although an applicant's comments are entered in the application file, they will not be commented upon by the examiner in charge of the application. *See id.*

Another facet of patent prosecution in which written records are extremely important is the recordation of interviews conducted between examiners and applicants. Examiner interviews concerning patent applications and other matters pending before the PTO serve to clarify the issues in an application and materially advance the prosecution of a case. The substance of an interview must be made of record in the application by means of an Interview Summary Form completed by the examiner and placed in the file wrapper. M.P.E.P. 713.04 (6th ed. 1995, rev. 2, July 1996). In addition, a complete written statement disclosing the substance presented at the interview must be filed by the applicant when reconsideration is requested in view of an interview with an examiner. 37 C.F.R. 1.133 (b) (1996). However, the examiner and applicant can agree that the Interview Summary Form satisfies applicant's obligation under Rule 133. M.P.E.P. 713.04.

A complete and accurate recordation of the substance of an examiner interview should include the following: an identification of the claims and prior art discussed; a description of proposed amendments; the general thrust of the applicant's and examiner's arguments; and the results of the interview. *Id.* Although the recordation of the arguments presented at the interview need not be lengthy or highly detailed, the general nature of the principal arguments should be readily apparent. *Id.*

The PTO is interested in ensuring that complete and accurate file histories are created and maintained. Public comments are invited to assist the PTO in identifying any improvements that can be made to increase the clarity and completeness of prosecution histories. The tenor of the following questions should not be taken as an indication that the PTO has taken a position on or is predisposed to any particular approach to creating and maintaining complete and clear file histories.

1. Do you believe that the current rules and procedures pertinent to recording prosecution histories are sufficiently clear and effective? If not, please:

(a) identify aspects of the rules and procedures that you believe lack clarity or do not facilitate the creation of adequate records;

(b) identify any changes to the rules and procedures that you believe would improve the clarity and completeness of file histories; and

(c) discuss potential advantages and hardships that patent applicants and examiners would face if particular changes were adopted.

2. Do you believe that examiners are correctly and uniformly applying the existing rules and procedures governing the recording of file histories? If not, please:

(a) provide or summarize examples in which you believe examiners have not maintained complete file histories;

(b) identify additional steps that can be taken by the PTO and applicants to clarify the prosecution history; and

(c) discuss possible advantages and drawbacks to the proposed changes.

3. Do examiners generally notify applicants when an amendment fails to point out the patentable novelty of applicant's invention, as required by 37 C.F.R. 1.111? If so, do you believe that examiners should continue to notify applicants of their failure to include a statement of novelty?

4. Is language such as "to further define and clarify the invention" sufficient to satisfy Rules 111 and 119 of 37 C.F.R. which require the applicant to point out how each amendment distinguishes the claims over the cited prior art? If not, please explain why applicants should be required to recite positively the rationale behind every claim amendment.

5. Should examiners be required to recite positively the reasons for amendments to claims when claims are amended by way of a formal examiner's amendment drafted pursuant to M.P.E.P. 1302.047 If so, do you believe this would discourage the practice of examiner amendments? Also, what effect would such a requirement have on the patent prosecution process?

6. Should the current practice of having examiners prepare reasons for allowance, as outlined in 37 C.F.R. 1.109, be discontinued? If so, please explain why you believe this is desirable. If not, should 37 C.F.R. 1.109 be amended to make it mandatory that reasons for allowance must be provided by the examiner? (Currently, according to 37 C.F.R. 109, setting forth reasons for allowance is not mandatory on the examiner's part.) If so, in which of the following instances should examiners be required to set forth reasons for allowance:

(a) in all allowable patent applications; or

(b) when the record, as a whole, is unclear as to why the patent application is being allowed.

7. Do reasons for allowance recorded by examiners contain accurate and precise interpretations regarding the novelty or nonobviousness of the claims? If not, please:

VOL 203 ISS 2 OCT 14 1997 UMI

(a) explain the experiences you have had that led you to your conclusions; and

(b) identify what you believe should be included in or omitted from an examiner's reasons for allowance.

8. What would prompt an applicant to comment on an examiner's statement of reasons for allowance?

9. If an applicant disagrees with an examiner's reasons for allowance, should applicant be obligated to respond? If so, should applicant's failure to file a statement commenting on the examiner's reasons for allowance be deemed an admission that applicant acquiesces to the reasoning of the examiner? (Currently, pursuant to 37 C.F.R. 1.109, failure to comment on the reasons for allowance does not imply that the patent applicant agrees with the reasoning of the examiner.)

10. Is the current practice of placing applicant's comments to reasons for allowance in the application file without further comment by the examiner adequate? If not, how and why should the current practice be changed?

11. Does the present system of recording examiner interviews by means of interview summary records, as outlined in M.P.E.P. 713.04, provide a complete record of the substance of the interview? If not, please:

(a) explain the experiences you have had that have led you to your conclusions;

and

(b) describe additional changes to the interview summary practice you believe would be desirable.

12. Should applicants be obligated to record the substance of every examiner interview, regardless of whether reconsideration is sought?

13. Should an examiner and applicant be permitted to agree that a written record of the substance of an interview by the applicant is not necessary?

14. Should the PTO require that telephonic and/or personal interviews between examiners, applicants, and attorneys be taped by electronic devices and transcribed into a written medium to be included in the file wrapper? If so, please:

(a) identify which type of interviews should be recorded by electronic devices;

(b) indicate whether transcriptions should be distributed to applicants;

(c) explain how this should be implemented;

(d) identify who should bear the cost; and

(e) discuss potential advantages and drawbacks to electronic recording of examiner interviews.

In the alternative, should applicants be permitted to request recording of examiner interviews by electronic devices? If so, please:

(a) identify which type of interviews applicants should be permitted to request recording;

(b) indicate whether transcriptions should be distributed to applicants;

(c) explain how this should be implemented;

(d) identify who should bear the cost; and

(e) discuss potential advantages and drawbacks to applicant-requested electronic recording of examiner interviews.

B. Other Issues

Parties may address related matters not specifically identified in the above topics. If this is done, parties are requested to:

1. Label that portion of their response as "Other Issues";

2. Clearly identify the matter being addressed;

3. Provide examples, when appropriate, that illustrate the matter addressed;

4. Identify any relevant legal authorities applicable to the matter being addressed; and

5. Provide suggestions regarding how the matter should be addressed by the PTO.

III. Guidelines for Oral Testimony

Individuals wishing to testify must adhere to the following guidelines:

1. Anyone wishing to testify at the hearings must request an opportunity to do so no later than November 3, 1997. Requests to testify may be accepted on the date of the hearing if sufficient time is available on the schedule. No one will be permitted to testify without prior approval.

2. Requests to testify must include the speaker's name, affiliation and title, mailing address, and telephone number. Facsimile number and Internet mail address, if available, should also be provided. Parties may include in their request an indication as to whether the party wishes to testify during the morning or afternoon session of the hearing.

3. Speakers will be provided between five and fifteen minutes to present their remarks. The exact amount of time allocated per speaker will be determined after the final number of parties testifying has been determined. All efforts will be made to accommodate requests for additional time for testimony presented before the day of the hearing.

4. Speakers may provide a written copy of their testimony for inclusion in the record of the proceedings. These remarks should be provided no later than November 25, 1997.

5. Speakers must adhere to guidelines established for testimony. These guidelines will be provided to all speakers on or before November 11, 1997. A schedule providing approximate times for testimony will be provided to all speakers the morning of the day of the hearing. Speakers are advised that the schedule for testimony will be subject to change during the course of the hearings.

IV. Guidelines for Written Comments

Written comments should include the following information:

1. Name and affiliation of the individual responding;

2. If applicable, an indication of whether comments offered represent views of the respondent's organization or are the respondent's personal views; and

3. If applicable, information on the respondent's organization, including the type of organization (e.g., business, trade group, university, or non-profit organization) and respondent's position, including type of experience (e.g., attorney handling patent prosecution and/or patent litigation, patent agent prosecuting patent applications, or judge deciding patent issues).

If possible, parties offering testimony or written comments should provide their comments in machine-readable format. Such submissions may be provided by electronic mail messages sent over the Internet, or on a 3.5" floppy disk formatted for use in either a Macintosh or MS-DOS based computer. Machine-readable submissions should be provided as unformatted text (e.g., ASCII or plain text), or as formatted text in one of the following file formats: Microsoft Word (Macintosh, DOS, or Windows versions) or WordPerfect (Macintosh, DOS, or Windows versions).

Information that is provided pursuant to this notice will be made part of a public record and may be available via the Internet. In view of this, parties should not provide information that they do not wish to be publicly disclosed or made electronically accessible. Parties who would like to rely on confidential information to illustrate a point are requested to summarize or otherwise provide the information in a way that will permit its public disclosure.

SPECIAL BOXES FOR PATENT MAIL

Special box designations should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these special boxes. If any documents other than the specified type identified for each special box are addressed to that box, they will be significantly delayed in reaching the appropriate area for which they are intended.

Please address mail as follows:

Box _____
Assistant Commissioner for Patents
Washington, D.C. 20231

Box Designations	Explanation
Box 7	Reissue applications for patents involved in litigation and subsequently filed related papers.
Box 12	Contributions to the Examiner Education Program.

SPECIAL BOXES FOR TRADEMARK MAIL

Special box designations should be used to allow forwarding of particular types of trademark mail to the appropriate areas as quickly as possible. In addition to these box designations, filers are encouraged to indicate whether the contents of the envelope contain a fee. Envelopes containing a fee should be marked "FEE;" envelopes not containing a fee should be marked "NO FEE." Box designations and "FEE/NO FEE" indicators should appear on the envelope as well as on the cover sheet or first page of any document.

Please address mail as follows:

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI²) in Sunnyvale, California.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

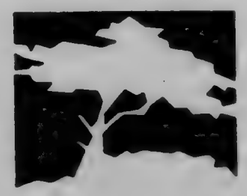
TRADEMARK REGISTRATIONS ISSUED UNDER SECTION 1(d)

The following marks have registered on the Principal Register pursuant to the intent-to-use provisions of Section 1(d) of the Trademark Act of 1946, as amended.



SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asterisks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.

Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1200 O.G. 98, on July 29, 1997.

For use of the European Patent Office as an International Searching Authority for international applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52, on September 28, 1982.

For use of the European Patent Office as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office, see the notices appearing in the *Official Gazette* at 1080 O.G. 2, on July 7, 1987, and at 1091 O.G. 2, on June 7, 1988. There is no longer a limit on the number of such international applications accepted for international preliminary examination by the European Patent Office; see the notice appearing at 1116 O.G. 32, on July 17, 1990.

The search fee of the European Patent Office was decreased, effective October 1, 1997, and was announced in the *Official Gazette* at 1202 O.G. 47, on September 16, 1997.

International fees were changed, effective on May 1, 1997, due to a change in the exchange rate of the U.S. dollar with regard to the Swiss franc, and were announced in the *Official Gazette* at 1197 O.G. 69, on April 22, 1997.

Certain domestic PCT fees and charges for International Search and Preliminary Examination were changed, effective October 1, 1997, and were announced in the *Official Gazette* at 1201 O.G. 63, on August 19, 1997.

Notice of Maintenance Fees Payable

Title 37 Code of Federal Regulations (CFR), Section 1.362(d) provides that maintenance fees may be paid without surcharge for the six-month period beginning 3, 7, and 11 years after the date of issue of patents based on applications filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(h), as amended effective Dec. 16, 1991. If the maintenance fee is not paid in the patent requiring such payment the patent will expire on the 4th, 8th, or 12th anniversary of the grant.

Attention is drawn to the patents which were issued on October 18, 1994 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 5,355,535 through 5,357,632
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on October 16, 1990 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,962,546 through 4,964,170
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on October 14, 1986 for which maintenance fees due at 11 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,616,365 through 4,617,683
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

For patents based on applications filed on or after Dec. 12, 1980, but before Aug. 27, 1982, patent owners must establish small entity status according to 37 CFR 1.27 if they have not done so and if they wish to pay the small entity amount.

The current amounts of the maintenance fees due at 3 years and six months, 7 years and six months, and 11 years and six months are set forth in 37 CFR 1.20(e)-(g), as amended Oct. 1, 1997, which are reproduced below:

37 CFR § 1.20 Post-issuance fees

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§ 1.9(f)) $525.00
By other than a small entity $1,050.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§ 1.9(f)) $1,050.00
By other than a small entity $2,100.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on applications filed on or after Dec. 12, 1980 in force beyond 12 years; the fee is due by eleven years and six months after the original grant:

By a small entity (§ 1.9(f)) $1,580.00
By other than a small entity $3,160.00

The amount of the surcharge for paying the maintenance fee during the grace period or after expiration of the patent are set forth in 37 CFR 1.20(h), and (i) which are reproduced below:

(h) Surcharge for paying a maintenance fee during the 6 month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980:

By a small entity (§ 1.9(f)) $65.00
By other than a small entity $130.00

(i) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been:

(1) unavoidable $700.00
(2) unintentional $1,640.00

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fee

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Notice of Expiration of Trademark Registrations Due To Failure to Renew

15 U.S.C. 1059 provides that each trademark registration may be renewed for periods of ten years from the end of the expiring period upon payment of the prescribed fee and the filing of an acceptable application for renewal. This may be done at any time within six months before the expiration of the period for which the registration was issued or renewed, or it may be done within three months after such expiration on payment of an additional fee.

According to the records of the Office, the trademark registrations listed below are expired due to failure to renew in accordance with 15 U.S.C. 1059.

Patent Terms Extended Under 35 U.S.C. § 156

Certificates extending the terms of the following patents were issued on September 5, 1997.

U.S. Patent No. 4,048,306; Granted September 13, 1977, to Roland Maier et al.; Owner of Record: Boehringer Ingelheim GmbH; Title: Aldehyde-Erythromycyclamine Condensation Products; Classification: 424/180; Product Trade Name: DYNABAC® (dirithromycin); Original Expiration Date: March 29, 1996; Term Extended: 1,626 days; Expiration Date of Extension: September 10, 2000.

U.S. Patent No. 4,235,892; Granted November 25, 1980, to T.L. Nagabhushan et al.; Owner of Record: Schering Corporation; Title: 1-Aryl-2-Acylamino-3-Fluoro-1-Propanols, Methods for Their Use as Antibacterial Agents and Compositions Useful Therefor; Classification: 514/522; Product Trade Name: NUFLOR® (Florfenicol); Original Expiration Date: February 5, 1999; Term Extended: Three years; Expiration Date of Extension: February 5, 2002.

U.S. Patent No. 4,379,785; Granted April 12, 1983, to Rudi Weyer et al.; Owner of Record: Hoechst Atiengesellschaft; Title: Heterocyclic Substituted Sulfonyl Ureas, and Their Use; Classification: 514/183; Product Trade Name: AMAYRL® (glimepiride); Original Expiration Date: December 17, 2000; Term Extended: 1,571 days; Expiration Date of Extension: April 6, 2005.

U.S. Patent No. 4,883,812; Granted November 28, 1989, to Salvador Moncada et al.; Owner of Record: Glaxo Wellcome Inc.; Title: Treatment of Hypertension Using Prostacyclin; Classification: 514/469; Product Trade Name: FLOLAN® (epoprostenol sodium); Original Expiration Date: September 3, 2002; Term Extended: 1,347 days; Expiration Date of Extension: May 12, 2006.

Changes to Patent Practice and Procedure

Agency: Patent and Trademark Office, Commerce.

Action: Final Rule.

Summary: The Patent and Trademark Office (Office) is amending the rules of practice to simplify the requirements of the rules, rearrange portions of the rules for better context, and eliminate unnecessary rules or portions thereof as part of a government-wide effort to reduce the regulatory burden on the American public. Exemplary changes include: (1) simplification of the procedure for filing continuation and divisional applications; (2) amendment of a number of rules to permit the filing of a statement that errors were made without deceptive intent, without a requirement for a further showing of facts and circumstances; and (3) elimination of the requirement that the inventorship be named in an application on the day of its filing, which eliminates the need for certain petitions to correct inventorship.

Effective Date: December 1, 1997.

For Further Information Contact: Hiram H. Bernstein or Robert W. Bahr, Senior Legal Advisors, by telephone at (703) 305-9285, or by mail addressed to: Box Comments—Patents, Assistant Commissioner for Patents, Washington, DC 20231 marked to the attention of Mr. Bernstein or by facsimile to (703) 308-6916.

Supplementary Information: This rule change implements the Administration's program of reducing the regulatory burden on the American public in accordance with the changes proposed in the Notice of Proposed Rulemaking entitled "1996 Changes to Patent Practice and Procedure" (Notice of Proposed Rulemaking), published in the *Federal Register* at 61 FR 49819 (September 23, 1996), and in the *Official Gazette* at 1191 *Off. Gaz. Pat. Office* 105 (October 22, 1996). The changes involve: (1) simplification of procedures for filing continuation and divisional applications, establishing lack of deceptive intent in reissues, petition practice, and in the filing of papers correcting improperly requested small entity status; (2) elimination of unnecessary requirements, such as certain types of petitions to correct inventorship under § 1.48; (3) removal of rules and portions thereof that merely represent instructions as to the internal management of the Office more appropriate for inclusion in the Manual of Patent Examining Procedure (MPEP); (4) rearrangement of portions of rules to improve their context; and (5) clarification of rules to aid in understanding of the requirements that they set forth.

Changes to proposed rules: This Final Rule contains a number of changes to the text of the rules as proposed for comment. The significant changes (as opposed to additional grammatical corrections) are discussed below. Familiarity with the Notice of Proposed Rulemaking is assumed.

Discussion of Specific Rules and Response to Comments: Forty-three written comments were received in response to the Notice of Proposed Rulemaking. The written comments have been analyzed. For contextual purposes, the comment on a specific rule and response to the comment are provided with the discussion of the specific rule. Comments in support of proposed rule changes generally have not been reported in the responses to comments sections.

Title 37 of the Code of Federal Regulations, Parts 1, 3, 5, 7, and 10 are amended as follows:

Part 1:

Section 1.4: Section 1.4, paragraphs (d)(1) and (2), are amended to be combined into § 1.4 paragraphs (d)(1)(i) and (d)(1)(ii). Section 1.4(d)(1)(ii) is also amended to include the phrase "direct or indirect copy" to clarify that the copy of the document(s) constituting the correspondence submitted to the Office may be a copy of a copy (of any generation) of the original document(s), or a direct copy of the original document(s).

Section 1.4(d)(2) is amended to provide that the presentation to the Office (whether by signing, filing, submitting, or later advocating) of any paper by a party, whether a practitioner or non-practitioner, constitutes a certification under § 10.18(b), and that violations of § 10.18(b)(2) may subject the party to sanctions under § 10.18(c). That is, by presenting a paper to the Office, the party is making the certifications set forth in § 10.18(b), and is subject to sanctions under § 10.18(c) for violations of § 10.18(b)(2), regardless of whether the party is a practitioner or non-practitioner. The sentence "[a]ny practitioner violating § 10.18(b) may also be subject to disciplinary action" clarifies that a practitioner may be subject to disciplinary action in lieu of or in addition to sanctions under § 10.18(c) for violations of § 10.18(b).

Section 1.4(d)(2) is amended so that the certifications set forth in § 10.18(b) are automatically made upon presenting any paper to the Office by the party presenting the paper. The amendments to §§ 1.4(d) and 10.18 support the amendments to §§ 1.6, 1.8, 1.10, 1.27, 1.28,1.48, 1.52, 1.55, 1.69, 1.102, 1.125, 1.137, 1.377, 1.378, 1.804, 1.805, (§§ 1.821 and 1.825 will be reviewed at a later date in connection with other matters), 3.26, and 5.4 that delete the requirement for verification (MPEP 602) of statements of facts by applicants and other parties who are not registered to practice before the Office. The absence of a required verification has been a source of delay in the prosecution of applications, particularly where such absence is the only defect noted. The change to §§ 1.4(d) and 10.18 automatically incorporates required averments thereby eliminating the necessity for a separate verification for each statement of facts that is to be presented, except for those instances where the verification requirement is retained. Similarly, the amendments to §§ 1.4(d) and 10.18 support an amendment to § 1.97 (§§ 1.637 and 1.673 will be reviewed at a later date in connection with other matters) that changes the requirements for certifications to requirements for statements. This change in practice does not affect the separate verification requirement for an oath or declaration under § 1.63, affidavits or declarations under §§ 1.130, 1.131, and 1.132, or statements submitted in support of a petition under § 5.25 for a retroactive license. The statements in §§ 1.494(e) and 1.495(f) that verification of translations of documents filed in a language other than English may be required is also maintained, as such requirements are made rarely and only when deemed necessary (*e.g.*, when persons persist in translations which appear on their face to be inaccurate). The requirements for certification of service on parties in §§ 1.248, 1.510, 1.637 and 10.142 are also maintained.

Section 1.4 is also amended to add a new paragraph (g) related to an applicant who has not made of record a registered attorney or agent being required to state whether assistance was received in the preparation or prosecution of a patent application. This is transferred from § 1.33(b) for consistent contextual purposes.

Section 1.6: Section 1.6(d)(3) is amended to provide that continued prosecution applications under § 1.53(d) may be transmitted to the Office by facsimile. However, the procedures described in § 1.8 do not apply to, and no benefit under § 1.8 will be given to, a continued prosecution application under § 1.53(d). That is, an applicant may file a continued prosecution application by facsimile transmission, but the filing date accorded such continued prosecution application will be the date the complete transmission of the continued prosecution application is received in the Office. For example, a continued prosecution application transmitted by facsimile from California at 10:30 pm (Pacific time) on November 18, 1997, and received in the Office at 1:30 am (Eastern time) on November 19, 1997, will be accorded a filing date of November 19, 1997. An applicant filing a continued prosecution application by facsimile transmission bears the responsibility of transmitting such application in a manner and at a time that will ensure its complete and timely (§ 1.53(d)(1)(ii)) receipt in the Office.

An applicant filing an application under § 1.53(d) (a continued prosecution application) by facsimile must include an authorization to charge (at least) the basic filing fee to a deposit account, or the application must be treated under § 1.53(f) as having been filed without the basic filing fee (as fees cannot otherwise be transmitted by facsimile). To avoid paying the late filing surcharge under § 1.16(e), an application (including an application under § 1.53(d)) must include the basic filing fee (§ 1.16(e)). As such, payment of the basic filing fee for an application under § 1.53(d) on any date later than the filing date of the application under§ 1.53(d) (even if paid within the period for reply to the last action in the prior application) is ineffective to avoid the late filing surcharge under § 1.16(e). Therefore, unless an application under § 1.53(d) filed by facsimile includes an authorization to charge the basic filing fee to a deposit account, the applicant will be given a notification requiring payment of the appropriate filing fee (§ 1.53(d)(3)) and the late filing surcharge under § 1.16(e) to avoid abandonment of the § 1.53(d) application.

Section 1.6(d)(3) is also amended to delete the reference to § 1.8(a)(2)(ii)(D) as this paragraph was deleted in the Final Rule entitled "Communications with the Patent and Trademark Office" ("Communications with the Office"), published in the *Federal Register* at 61 FR56439, 56443 (November 1, 1996), and in the Official Gazette at 1192 *Off. Gaz. Pat. Office* 95 (November 26, 1996).

Section 1.6(d)(6) is amended to reflect the transfer of material from §§ 5.6, 5.7, and 5.8 to §§ 5.1 through 5.5.

Section 1.6(e)(2) is amended to remove the requirement that the statement be verified in accordance with the change to §§ 1.4(d)(2) and 10.18.

Section 1.6(f) is added to provide for the situation in which the Office has no evidence of receipt of an application under § 1.53(d) (a continued prosecution application) transmitted to the Office by facsimile transmission. Section 1.6(f) requires that a showing thereunder include, *inter alia,* a copy of the sending unit's report confirming transmission of the application under § 1.53(d) or evidence that came into being after the complete transmission of the application under § 1.53(d) and within one business day of the complete transmission of the application under § 1.53(d). Therefore, applicants are advised to retain copies of the sending unit's reports in situations in which such unit is used to transmit applications under § 1.53(d) to the Office or otherwise maintain a log book of the transmission of any application under § 1.53(d) to the Office. *See also* "Communications with the Patent and Trademark Office" Final Rule.

No comments were received regarding the proposed change to § 1.6.

Section 1.8: Section 1.8(a)(2)(i)(A) is amended to specifically refer to a request for a continued prosecution application under § 1.53(d) as a correspondence filed for the purposes of obtaining an application filing date, which is excluded by § 1.8(a)(2)(i)(A) from the procedure set forth in § 1.8. The purpose of this amendment is to render it clear that, notwithstanding that a continued prosecution application under § 1.53(d) may be filed by facsimile transmission, the procedure set forth in § 1.8 does not apply to a request for a continued prosecution application under § 1.53(d) (or any correspondence filed for the purpose of obtaining an application filing date). That is, the date on the certificate of transmission (§ 1.8(a)) of an application under § 1.53(d) is not controlling (or even relevant), in that an application under § 1.53(d) (a continued prosecution application) filed by facsimile transmission will not be accorded a filing date as of the date on the certificate of transmission (§ 1.8(a)), unless Office records indicate, or applicant otherwise establishes pursuant to § 1.6(f), receipt in the Office of the complete application under § 1.53(d) on the date on the certificate of transmission, and that date is not a Saturday, Sunday, or Federal holiday.

Section 1.8(b)(3) is amended to remove the requirement that the statement be verified in accordance with the change to §§ 1.4(d)(2) and 10.18.

Section 1.9: Section 1.9(d) is amended to define a small business concern as used in 37 CFR Chapter I as any business concern meeting the size standards set forth in 13 CFR Part 121 to be eligible for reduced patent fees. The regulations of the Small Business Administration (SBA) set forth the size standards of a business concern to be eligible for reduced patent fees. *See* 13 CFR 121.802. Thus, the language in § 1.9(d) duplicating such size standards is deleted as redundant, and to avoid confusion in the event that such size standards are subsequently changed by the SBA. The MPEP will include SBA's regulations concerning size standards for a business concern to be eligible for reduced patent fees.

Section 1.9(f) is amended to add the phrase "eligible for reduced patent fees" to clarify that a small entity as used in 37 CFR Chapter I is limited to an independent inventor, a small business concern or a non-profit organization that is eligible for reduced patent fees under 35 U.S.C. 41(h)(1).

Section 1.10: Sections 1.10(d) and (e) are amended to remove the requirement for a statement that is verified.

Comment 1: One comment suggested that § 1.10 be amended to clearly set forth the controlling date for correspondence filed by "Express Mail" under § 1.10.

Response: Section 1.10 was substantially amended in the "Communications with the Office" Rule Final (discussed *supra*). Section 1.10(a) as amended in the aforementioned Final Rule provides that: (1) correspondence received by the Office that was delivered by the "Express Mail Post Office to Addressee" service of the United States Postal Service (USPS) under § 1.10 will be considered filed in the Office on the date of deposit with the USPS; (2) the date of deposit with the USPS is shown by the "date-in" on the "Express Mail" mailing label or other official USPS notation; and (3) if the USPS deposit date cannot be determined, the correspondence will be accorded the Office receipt date as the filing date.

Section 1.11: Section 1.11(b) is amended to provide that the filing of a continued prosecution application under § 1.53(d) of a reissue application will not be announced in the *Official Gazette.* Although the filing of a continued prosecution application of a reissue application constitutes the filing of a reissue application, the announcement of the filing of such continued prosecution application would be redundant in view of the announcement of the filing of the prior reissue application in the *Official Gazette.*

Section 1.14: Section 1.14(a) is amended to: (1) clarify the provisions of § 1.14(a); (2) provide that copies of an application-as-filed may be provided to any person on written request accompanied by the fee set forth in § 1.19(b), without notice to the applicant, if the application is incorporated by reference in a U.S. patent; and (3) treat applications in the file jacket of a pending application under § 1.53(d) as pending rather than abandoned in determining whether copies of, and access to, such applications will be granted.

Under current practice, the public is entitled to access to the original disclosure (or application-as-filed) of an application, when the application is incorporated by reference into a U.S. patent. *See In re Gallo,* 231 USPQ 496 (Comm'r Pat. 1986). Section 1.14(a)(2) is added to avoid the need for a petition under § 1.14(e) to obtain a copy of the original disclosure (or application-as-filed) of an application that is incorporated by reference into a U.S. patent.

Section 1.14 is also amended to add a paragraph (f) to recognize the change to § 1.47(a) and(b) which add exceptions to maintaining pending applications in confidence by providing public notice to nonsigning inventors of the filing of a patent application.

Comment 2: One comment stated that the change from "applications preserved in secrecy" to "applications preserved in confidence" suggests a lower level of security for the applications permitting greater discovery by third parties.

Response: The term "secrecy" in § 1.14 was changed to "confidence" in the Final Rule entitled "Miscellaneous Changes in Patent Practice" ("Miscellaneous Changes in Patent Practice"), published in the *Federal Register* at 61 FR 42790 (August 19, 1996), and in the *Official Gazette* at 1190 *Off. Gaz. Pat. Office* 67 (September 17, 1996). This change did not represent a change in practice, but merely conformed the language of § 1.14 to that of 35 U.S.C. 122 (the term "secrecy" is a term of art in regard to matters of national security, and its former use in § 1.14 was inappropriate).

Section 1.16: Section 1.16 is amended to add new paragraphs (m) and (n) including the unassociated text following paragraphs (d) and (l).

No comments were received concerning § 1.16.

Section 1.17: Section 1.17 (and § 1.136(a)) adds a recitation to an extension of time fee payment for a reply filed within a fifth month after a nonstatutory or shortened statutory period for reply was set.

Section 1.17(a) is subdivided into paragraphs (a)(1) through (a)(5), with paragraphs (a)(1)through (a)(4) setting forth the amounts for one-month through four-month extension fees. Section 1.17(a)(5) provides the small entity and other than small entity amounts for the new fifth-month extension fee.

Section 1.17(a) is being amended to permit a petition for a fifth-month extension of time. As the Office may set a shortened statutory period for reply of one-month or thirty days, whichever is longer, this authority for a petition under § 1.136(a) will permit an applicant to extend the period for reply until the six-month statutory maximum (35 U.S.C. 133) without resorting to a petition under § 1.136(b), or to extend by five months, pursuant to § 1.136(a), a non-statutory period for taking action (*e.g.,* the time period in § 1.192(a) for filing an appeal brief).

Section 1.17 paragraphs (e), (f), and (g) are rewritten as § 1.17 paragraphs (b), (c), and (d).

Section 1.17(h) is amended to delete references to petitions under §§ 1.47, 1.48, and 1.84. Sections 1.47, 1.48, and 1.84(a) and (b) are amended to contain a reference to the petition fee set forth in § 1.17(i), rather than the petition fee set forth in § 1.17(h).

Section 1.17(i) is amended to: (1) add a petition under § 1.41 to supply the name(s) of the inventor(s) after the filing date without an oath or declaration as prescribed by § 1.63, excepting provisional applications; (2) add a petition under § 1.47 for filing by other than all the inventors or a person not the inventor; (3) add a petition under § 1.48 for correction of inventorship, except in provisional applications; (4) add a petition under § 1.59 for expungement and return of information; (5) delete the references to petitions under §§ 1.60 and 1.62 in view of the deletion of §§ 1.60 and 1.62; (6) add a petition under § 1.84 for accepting color drawings or photographs; and (7) add a petition under § 1.91 for entry of a model or exhibit.

Section 1.17(q) is amended to add a petition under § 1.41 to supply the name(s) of the inventor(s) after the filing date without a cover sheet as prescribed by § 1.51(c)(1) in a provisional application.

Section 1.17, as well as §§ 1.103, 1.112, 1.113, 1.133, 1.134, 1.135, 1.136, 1.142, 1.144, 1.146, 1.191, 1.192, 1.291, 1.294, 1.484, 1.485, 1.488, 1.494, 1.495, (§§ 1.530, 1.550, 1.560, 1.605, 1.617, 1.640, and 1.652 will be reviewed at a later date in connection with other matters), 1.770, 1.785, (§ 1.821 will be reviewed at a later date in connection with other matters), and 5.3 are also amended to replace the phrases "response" and "respond" with the phrase "reply" for consistency with § 1.111.

Comment 3: One comment questioned why the terms "respond" and "response" in the rules of practice were being replaced with the term "reply."

Response: It is appropriate to use a single term ("reply") throughout the rules of practice, to the extent possible, to refer to that "reply" by an applicant to an Office action required to avoid abandonment and continue prosecution.

Comment 4: At least one comment noted that there is no statu-

tory authority under 35 U.S.C. 41(a)(8)(C) for the $2,010 amount set for the fifth month extension of time.

Response: While the Notice of Proposed Rulemaking proposed a fifth month extension fee of $2010, a Notice of Proposed Rulemaking entitled "Revision of Patent and Trademark Fees for Fiscal Year 1998" ("1998 Fee Revision"), published in the *Federal Register* at 62 FR 24865 (May 7, 1997), and in the *Official Gazette* at 1198 *Off. Gaz. Pat. Office* 97 (May 27, 1997), proposed that this fee be set at $2060. The Office is now adopting the $2060 fifth month extension fee as proposed in the "1998 Fee Revision" Notice of Proposed Rulemaking.

Under 35 U.S.C. 41(a)(8)(C) (1991), the Commissioner is authorized to charge $340 for any third or subsequent petition for a one-month extension of time. However, under 35 U.S.C. 41(f), the additional fee established pursuant to 35 U.S.C. 41(a)(8)(C) for a subsequent petition for a one-month extension of time has been increased to $560 (*i.e.*, $560 is the current difference (established under 35 U.S.C. 41(a)(8)(C)) between the $1510 fee for a four-month extension of time and the $950 three-month extension of time). The $1510 fee for a four-month extension of time plus the $560 fee for an additional month is $2070 (this differs from the $2060 fee proposed in the "1998 Fee Revision" Notice of Proposed Rulemaking due to rounding). Therefore, the Office is authorized under 35 U.S.C. 41(a)(8) to establish a fee of $2060 for a five-month extension of time.

Section 1.21: Section 1.21(l) is amended for consistency with § 1.53, and § 1.21(n) is amended to change the reference to an improper application under §§ 1.60 or 1.62 to a reference to an application in which proceedings are terminated pursuant to § 1.53(e).

No comments were received regarding the proposed change to § 1.21.

Section 1.26: Section 1.26(a) is amended to better track the statutory language of 35 U.S.C. 42(d) and to add back language relating to refunds of fees paid that were not "required" that was inadvertently dropped in the July 1, 1993, publication of title 37 CFR, and from subsequent publications.

No comments were received regarding the proposed change to § 1.26.

Section 1.27: Section 1.27 paragraphs (a) through (d) are amended to remove the requirement that a statement filed thereunder be "verified," and to replace "aver" and "averring" with "state" and "stating." See comments relating to § 1.4(d). Section 1.27(b) is also amended for clarification with the movement of a clause relating to "any verified statement" within a sentence.

No comments were received regarding the proposed change to § 1.27.

Section 1.28: Section 1.28(a) is amended to remove the requirement for a statement that is "verified." See comments relating to § 1.4(d).

Section 1.28(a) is also amended to provide that a new small entity statement is not required for a continuing or reissue application where small entity status is still proper and reliance is placed on a reference to a small entity statement filed in a prior application or patent or a copy thereof is supplied. Section 1.28(a) is further amended to state that the payment of a small entity basic statutory filing fee in a nonprovisional application, which claims benefit under 35 U.S.C. 119(e), 120, 121, or 365(c) of a prior application (including a continued prosecution application) or in a reissue application, where the prior application or the patent has small entity status, will constitute a reference in the continuing or reissue application to the small entity statement in the prior application or in the patent, thereby establishing small entity status in such a nonprovisional application.

Section 1.28(a) is also amended to require a new determination of continued entitlement to small entity status for continued prosecution applications filed under § 1.53(d) and to clarify that the refiling of applications as continuations, divisions and continuation-in-part applications and the filing of reissue applications also require a new determination of continued entitlement to small entity status prior to reliance on small entity status in a prior application or patent.

Comment 5: One comment asked whether the change to § 1.28 regarding small entity requires that a small entity statement be filed with each continuing application.

Response: While the filing of a continuing application requires a new determination of entitlement to small entity status, § 1.28(a) continues to permit reliance on a small entity statement filed in a prior application for nonprovisional continuing applications.

Section 1.28(c) is amended to remove the requirement for a statement of facts explaining how an error in payment of a small entity fee(s) occurred in good faith and how and when the error was discovered. A fee deficiency payment under § 1.28(c) must include the difference between fee(s) originally paid as a small entity and the other than small entity fee(s) in effect at the time of payment of the complete fee deficiency. A fee deficiency payment under§ 1.28(c) will be treated as a representation by the party submitting the payment that small entity status was established in good faith and that the original payment of small entity fees was made in good faith. Any paper submitted under § 1.28(c) will be placed in the appropriate file without review after the processing of any check or the charging of any feed efficiency payment specifically authorized.

Comment 6: One comment suggested that § 1.28(c) be amended to clarify current Office practice regarding the acceptance of papers under § 1.28(c)(2) in light of two recent District Court decisions: (1) *Haden Schweitzer Corp. v. Arthur B. Myr Industries, Inc.*, 901 F.Supp. 1235, 36 USPQ2d 1020 (E.D. Mich. 1995); and (2) *DH Technology, Inc. v. Synergstex International, Inc.*, 937 F. Supp. 902, 40 USPQ2d 1754 (N.D. Cal. 1996).

Response: The Office is also aware of a recent District Court decision in *Jewish Hospital of St. Louis v. Idexx Laboratories*, 951 F. Supp 1, 42 USPQ2d 1720 (D. Me. 1996), that relies on § 1.28(c)(2) exclusively. The changes to § 1.28(c) are not directed to the issue of whether § 1.28(c)(2) must be viewed as the exclusive remedy. Nevertheless, an applicant or patentee can avoid undesirable results by not claiming small entity status unless it is absolutely certain that the applicant or patentee is entitled to small entity status (*i.e.*, resolving any doubt,uncertainty, or lack of information in favor of payment of the full fee). *See* MPEP 509.03 ("Small entity status must not be established unless the person or persons signing the . . . statement can unequivocally make the required self-certification" (emphasis added)).

Section 1.33: Section 1.33 is amended to no longer provide that the required residence and post office address of the applicant can appear elsewhere than in the oath or declaration under § 1.63. Section 1.63(a)(3) is amended to require that the post office address as well as the residence be identified therein and not elsewhere. Permitting the residence to be elsewhere in the application other than the oath or declaration, as was in § 1.33(a), would be inconsistent with unamended § 1.63(c) that states that the residence must appear in the oath or declaration. The requirement for placement of the post office address is equivalent to the requirement for the residence to eliminate confusion between the two, which often are the same destination and are usually provided in the oath or declaration. The reference in § 1.33(a) to the assignee providing a correspondence address has been moved within § 1.33(a) for clarification. Other clarifying language includes a reference to § 1.34(b), use of the terms "provided," "furnished" rather than "notified," and "application" rather than "case," and deletion of the expression "of which the Office."

The former language of § 1.33(b) is transferred to new § 1.4(g). Section 1.33(b) is amended to set forth the signature requirement for papers filed in an application (formerly in § 1.33(a)). Section 1.33(b) is specifically amended to provide that amendments and other papers filed in an application must be signed by: (1) an attorney or agent of record appointed in compliance with § 1.34(b); (2) a registered attorney or agent not of record who acts in are presentative capacity under the provisions of § 1.34(a); (3) the assignee of record of the entire interest (if there is such); (4) an assignee of record of an undivided part interest (if there is such), so long as the amendment or other paper is also signed by any assignee(s) of the remaining interest and any applicant retaining an interest; or (5) all of the applicants, including applicants under §§ 1.42, 1.43 and 1.47, unless there is an assignee of record of the entire interest and such assignee has chosen to prosecute the application to the exclusion of the applicant(s), and, as such, has taken action in the application in accordance with §§ 3.71 and 3,73. This is not a change in practice, but simply a clarification of current signature requirements.

No comments were received regarding the proposed change to § 1.33.

Section 1.41: Section 1.41(a) (and § 1.53) is amended to no longer require that a patent be applied for in the name of the actual inventors for an application for patent to be accorded a filing date. The requirement for use of full names is moved to § 1.63(a) for better context. Section 1.41(a) is specifically amended: (1) to provide that a patent is applied for in the name(s) of the actual inventor(s); (2) to add paragraphs (a)(1) and (a)(2) indicating how the inventorship is set forth in a nonprovisional and provisional application; and (3) to add paragraph (a)(3) indicating the need for an identifier consisting of alphanumeric characters if no name of an actual inventor is provided.

Section 1.41(a)(1) provides that the inventorship of a nonprovisional application is that inventorship set forth in the oath or declaration as prescribed by § 1.63, except as provided for in §§ 1.53(d)(4) and 1.63(d). Section 1.41(a)(1) also provides that if an oath or declaration as prescribed by § 1.63 is not filed during the pendency of a nonprovisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(b), unless a petition under this paragraph accompanied by the fee set forth in § 1.17(i) is filed supplying the name(s) of the inventor(s).

Section 1.41(a)(2) provides that the inventorship of a provisional application is that inventorship set forth in the cover sheet as prescribed by § 1.51(c)(1). Section 1.41(a)(2) also provides that if a cover sheet as prescribed by § 1.51(c)(1) is not filed during the pendency of a provisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(c), unless a petition under this paragraph accompanied by the fee set forth in § 1.17(q) is filed supplying the name(s) of the inventor(s).

35 U.S.C. 120 and § 1.78(a) require, *inter alia*, that an application have at least one inventor in common with a prior application to obtain the benefit of the filing date of such application. Considering the executed oath or declaration (or cover sheet in a provisional application) the sole mechanism for naming the inventor(s) would operate as a trap in the event that an application were abandoned prior to the filing of an oath or declaration in favor of a continuing application (or in the event that a cover sheet was not filed in a provisional application). To avoid this result, § 1.41 as adopted provides that the inventorship is that inventorship named in an executed oath or declaration under § 1.63 (or in the cover sheet under § 1.51(c)(1) in a provisional application), but that if no executed oath or declaration under § 1.63 (or cover sheet under § 1.51(c)(1) in a provisional application) is filed during the pendency of the application, the inventorship will be considered to be the inventor(s) named in the original application papers.

In the peculiar situation in which no inventor is named in the original application papers (or the correct inventor(s) are not named in the original application papers), and no executed oath or declaration under § 1.63 (or cover sheet under § 1.51(c)(1) in a provisional application) is filed during the pendency of the application, it will be necessary for the applicant to file a petition under § 1.41(a) (and appropriate fee) to name the inventor(s). No explanation (other than that the paper is supplying or changing the name(s) of the inventor(s)) or showing off acts concerning the inventorship or any delay in naming the inventorship is required or desired in a petition under § 1.41(a). The petition fee is required to cover (or defray in a provisional application) the costs of updating the Office's records for the application.

Where no inventor(s) is named on filing, the Office requests that an identifying name be submitted for the application. The use of very short identifiers should be avoided to prevent confusion. Without supplying at least a unique identifying name the Office may have no ability or only a delayed ability to match any papers submitted after filing of the application and before issuance of an identifying application number with the application file. Any identifier used that is not an inventor's name should be specific, alphanumeric characters of reasonable length, and should be presented in such a manner that it is clear to application processing personnel what the identifier is and where it is to be found. It is strongly suggested that applications filed without an executed oath or declaration under §§ 1.63 or 1.175 include the name of the person(s) believed to be the inventor for identification purposes. Failure to apprise the Office of the application identifier being used may result in applicants having to resubmit papers that could not be matched with the application and proof of the earlier receipt of such papers where submission was time dependent.

As any inventor(s) named in the original application papers is considered to be the inventor(s) only when no oath or declaration under § 1.63 is filed in a nonprovisional application or cover sheet under § 1.51(c)(1) filed in a provisional application, the recitation of the inventorship in an application submitted under § 1.53(b) or (d) without an executed oath or declaration or cover sheet, respectively, for purposes of identification may be changed merely by the later submission of an oath or declaration executed by a different inventive entity without recourse to a petition under §§ 1.41 or 1.48.

Comment 7: One comment noted that when an application is filed only an alphanumeric identifier may be used, which would of necessity require a correction of inventorship, and questioned how a verified statement under § 1.48(a) could be filed as there would be no person to sign such statement, whether the Office will require that the name(s) of the inventor(s) be submitted within a specified period, and whether the filing date will be lost if the name(s) of the inventor(s) is not submitted within such period.

Response: The name(s) of the inventor(s) in a nonprovisional application are provided in the oath or declaration under § 1.63 (§ 1.41(a)(2)) and the name(s) of the inventor(s) in a provisional application are provided in the cover sheet (§ 1.41(a)(3)). Thus, an application filed without the name(s) of the inventor(s) must also have been filed without an oath or declaration under § 1.63 (nonprovisional) or cover sheet (provisional).

The Office will set a time period in a nonprovisional application filed without an oath or declaration under § 1.63 for the filing of such an oath or declaration (§ 1.53(f)). The Office will set a time period in a provisional application filed without a cover sheet for the filing of such cover sheet (§ 1.53(g)). The subsequently filed oath or declaration or cover sheet will provide the name(s) of the inventor(s). No petition under § 1.48(a) would be required where there was an alphanumeric identifier (and not a name of a person) or where the person(s) set forth as the inventor(s) was incorrect.

In the event that an oath or declaration or cover sheet is not timely filed, the application will become abandoned and the inventorship will be considered to be the inventor(s) named in the original application papers. The failure to timely file an oath or declaration, cover sheet, or the name(s) of the inventor(s) is not a filing date issue.

Comment 8: One comment thought that the proposed change eliminating the need to identify any inventor would lead to sloppy filing procedures and that it should in almost all cases be possible for practitioners to correctly identify the inventors at the time of filing.

Response: Experience has demonstrated that a significant number of applications filed under§ 1.53(b) without an executed oath or declaration have been filed with incorrect inventorships with explanations running from "there was no time to investigate the inventorship" to "the inventors contacted either did not understand the inventorship requirements under U.S. patent law or did not appreciate that the claims as filed included or did not include the contribution of the omitted or erroneously added inventor." Additionally, Office experience is that while almost all § 1.48(a) petitions concerning such matters are even-

tually granted, only a small percentage are granted on the initial petition thereby causing a prolonged prosecution period, which is undesirable in view of the amendment to 35 U.S.C. 154 contained in the Uruguay Round Agreements Act (URAA), Pub. L. 103-465, 108 Stat. 4809 (1994).

Section 1.47: Section 1.47 paragraphs (a) and (b) are amended, pursuant to 35 U.S.C. 116 and 35 U.S.C 118, to provide for publication in the *Official Gazette* of a notice of filing for all applications, except for continued prosecution applications under § 1.53(d), submitted under this section rather than only when notice to the nonsigning inventor(s) is returned to the Office undelivered or when the address of the nonsigning inventor(s) is unknown. The information to be published, after grant of the § 1.47 petition, will include: The application number, filing date, invention title and name(s) of the nonsigning inventor(s). Letters returned as undeliverable are difficult to match with the related application file, and when matched with the file, the applications are burdensome to flag as requiring further action by the Office. Accordingly, the return of letters is not a desirable means of triggering publication of a notice to a nonsigning inventor as to the filing of the application. Furthermore, when a returned letter is used as such a trigger, another review of the application must be made for returned correspondence. As the best time for review of returned letters is after allowance, but before issuance, of an application, processing of the application would be delayed and done at a time that could be best used for printing related processing requirements. Printing of notice of the filing of all applications wherein § 1.47 status is granted does not require any such review to be made. In order to best balance the obligation of providing notice to inventors and efficient processing of applications, notice in the *Official Gazette* of the filing of § 1.47 applications will be prepared essentially at the same time that the letter notice is directly sent to the nonsigning inventor.

Paragraphs (a) and (b) of this section are also amended to exclude the filing of continued prosecution applications under § 1.53(d) from the notice requirement.

Section 1.47 is also amended for clarification purposes. A reference to an "omitted inventor" in § 1.47(a) is replaced with "nonsigning inventor." The statements in § 1.47 paragraphs (a)and (b) that a patent will be granted upon a satisfactory showing to the Commissioner are deleted as unnecessary. Section 1.47(b) is amended to clarify that it applies only where none of the inventors are willing or can be found to sign the oath or declaration by substitution of "an inventor" by "all the inventors." The use of "must state" in regard to the last known address is deleted as redundant in view of the explicit requirement for such address in the rule. The sentence in § 1.47(b) referring to the filing of the assignment, written agreement to assign or other evidence of proprietary interest is deleted as redundant in view of the requirement appearing earlier in § 1.47(b) calling for "proof of pertinent facts."

Comment 9: One comment believed that the amendment to § 1.47(b) results in a change in practice permitting an assignee to proceed thereunder only where all the inventors refuse to sign, and that the assignee should not be precluded from making the required declaration where only one inventor refuses to cooperate as the other inventors may not have personal knowledge of the facts.

Response: While the specific language of § 1.47(b) is amended to recite the condition that "all the inventors refuse to execute an application" the prior use of the term "inventor" was intended to mean and was interpreted as meaning all inventors. *See* MPEP 409.03(b). Accordingly, the language clarification is not a change in practice.

Although it is unclear as to what particular "facts" the comment is addressed to that the other inventors would not have personal knowledge of, facts as to the inventorship of the noncooperating inventor would better lie with the other inventors who are after all required to be joint inventors, 35 U.S.C. 116, and therefore the other inventors should have the best knowledge of the facts required for a declaration under § 1.63. Any declaration of facts, in support of the petition, to show, *e.g.*, that an inventor has refused to sign a declaration after having been given an opportunity to do so, should be made by someone with first-hand knowledge of the events, such as the attorney who presented the inventor with the application papers.

Section 1.48: Section 1.48 provides for correction of inventorship in an application (other than a reissue application). Section 1.324 provides for correction of inventorship in a patent. Sections 1.171 and 1.175 provide for correction of inventorship in a patent *via* a reissue application.

Section 1.48 is amended in its title to clarify that the section concerns patent applications, other than reissue applications, and not patents. Where a patent names an incorrect inventive entity, the inventorship error may be corrected by reissue. *See* MPEP 1402. Where a reissue application names an incorrect inventive entity in the executed reissue oath or declaration (whether the reissue application is filed for the sole purpose or in-part to correct the inventorship, or is filed for purposes other than correction of the inventorship), a new reissue oath or declaration in compliance with § 1.175 may be submitted with the correct inventorship without a petition under § 1.48. This is because it is the inventorship of the patent being reissued that is being corrected (*via* a reissue application).

35 U.S.C. 251, ¶3, provides that the provisions of title 35, U.S.C., relating to applications apply to reissue applications. 35 U.S.C. 116, ¶3, authorizes the Commissioner to permit correction of inventorship in an application under such terms as the Commissioner prescribes. The Commissioner has determined that correction of inventorship in a reissue application may be accomplished under 35 U.S.C. 251 *via* the reissue oath or declaration, without resort to a petition under § 1.48. Therefore, § 1.48 has been amended to specifically exclude its applicability to correction of inventorship in a reissue application.

Section 1.48(a) will not require correction of the inventorship if the inventorship or other identification under § 1.41 was set forth in error on filing of the application. Section 1.48(a) is amended to apply only to correction of inventor or inventors, in applications, other than reissue applications, from that named in an originally filed executed oath or declaration andnot to the naming of inventors or others for identification purposes under § 1.41. The statement to be submitted will be required only from the person named in error as an inventor or from the person who through error was not named as an inventor rather than from all the original named inventors so as to comply with 35 U.S.C. 116. The requirement that any amendment of the inventorship under § 1.48(a) be "diligently" made has been removed. The applicability of a rejection under 35 U.S.C. 102(f) or (g) against an application with the wrong inventorship set forth therein and any patent that would issue thereon is a sufficient motivation for prompt correction of the inventorship without the need for a separate requirement for diligence.

Comment 10: Two comments expressed opposition to deletion of the diligence requirement in § 1.48 paragraphs (a) through (c) in that removal thereof would seem to promote delay in correction of the inventorship and decrease the importance of having the correct inventorship.

Response: In addition to the motivation noted in the explanation of the rules for not allowing a patent to issue with improper inventorship, the criteria for correction of the inventorship becomes more restrictive subsequent to issuance under § 1.324 (having a statutory basis under 35 U.S.C. 256) than under § 1.48(a) (having a statutory basis under 35 U.S.C. 116). 35 U.S.C. 256 requires participation by all the parties including each original named inventor, which participation may be harder to obtain after the patent has issued. Petitions under § 1.48(a) filed earlier while the application is pending may seek waiver under § 1.183 of participation of some of the parties needed to participate. Additionally, petitions under § 1.48 in pending applications are not entered as a matter of right in rejected (the criteria of § 1.116 applies) or allowed (the criteria of § 1.312 applies) applications. *See* § 1.48(a) and MPEP 201.03.

A clarifying reference to § 1.634 is added in § 1.48(a) for instances when inventorship correction is necessary during an interference and has been moved from § 1.48(a)(4) for improved contextual purposes.

The § 1.48(a)(1) statement requires a statement only as to the lack of deceptive intent rather than a statement of facts to establish how the inventorship error was discovered and how it occurred, since the latter requirement is deleted. Additionally, the persons from whom a statement is required now includes any person who through error was not named as an inventor but limits statements from the original named inventors to only those persons named in error as inventors rather than all persons originally named as inventors including those correctly named. The paragraph is amended to remove the requirement that the statement be verified in accordance with the change to §§ 1.4(d)(2) and 10.18.

Comment 11: One comment opposed the removal of the Office from examining the issue of inventorship as substantive law invalidates patents that have issued in the names of incorrect inventors and the Office is charged with the duty of examining applications for the purpose of denying issue to those applications that do not meet the standards of patentability. Where an oath has originally been filed asserting the proper inventor is one entity and a subsequent paper asserts that the proper inventor is another, under such circumstances "the facts are inherently suspect" and an investigation by the Office is warranted and required by statute.

Response: The amendments to § 1.48 have otherwise received overwhelming support.

The Office has pursued the existence of improper inventorship in applications by rejection under 35 U.S.C. 102(f) or (g) and will continue to do so independent of the change in the verified statement requirements under § 1.48 paragraphs (a) or (c). A request to change inventorship, however, often requested by the current inventors or assignee on their own initiative is not seen to be inherently fraught with deceptive intent as to warrant a close and detailed examination absent more. A statement that the error was made without deceptive intent is seen to be a sufficient investigation complying with the statutory requirement under 35 U.S.C. 116, particularly as most petitions are eventually granted or an application can be refiled naming the new desired inventive entity. Refiling of the application to change the inventorship will not cause the Office, absent more, to initiate an investigation as to the correct inventorship or cause a rejection under 35 U.S.C. 102(f) or (g) to be made. Additionally, it should be noted that the Office views a petition under § 1.48 to be a procedural matter and not to represent a substantive determination as to the actual inventorship. *See* MPEP 201.03, Verified Statement of Facts.

For those situations where there was deceptive intent, the Office is lacking certain necessary tools for a thorough inquiry (*e.g.*, subpoena authority) to ascertain the truth thereof (as in other situations under §§ 1.28 and 1.56). However, the inquiry cannot be waived by the Office due to the statutory requirement under 35 U.S.C. 116. There is no other reasonable course of action than to accept as an explanation for the execution of a § 1.63 oath or declaration setting forth an erroneous inventive entity that the inventor did not remember the contribution of the omitted inventor at the time the oath or declaration was executed (absent subpoena power and *inter parties* hearings), and therefore further inquiries into the matter other than a statement of lack of deceptive intent are a waste of Office resources.

Comment 12: One comment suggested that in limiting the submission of a verified statement of facts to only the parties being added or deleted as inventors, agreement of the original named inventors should also be obtained as is currently done when verified statements of facts from all the original named inventors are required.

Response: Agreement or acquiescence of the original named inventors, to the extent that they remain as inventors, to the new inventorship will be obtained through the retained requirement that the actual inventive entity complete a new oath or declaration under § 1.63, which must set forth the new inventive entity. Additionally, through the rule changes to this section and §§ 1.28 and 1.175 the Office is decreasing its investigation of claims relating to a lack of deceptive intent. The remaining purpose of these rules is to force the applicant(s) to merely make an assertion as to a lack of deceptive intent thereby permitting subsequent reviewers (tribunals or otherwise) to determine, in light of all the available facts, whether the applicant(s) complied with the statute.

Section 1.48(a)(2) is amended for clarification purposes to indicate the availability of §§ 1.42, 1.43 or 1.47 in meeting the requirement for an executed oath or declaration under § 1.63 from each actual inventor. Section 1.47 is only applicable to the person to be added as an inventor (inventors named in an application transmittal letter can be deleted without petition). For those persons already having submitted an executed oath or declaration under § 1.63, apetition under § 1.183, requesting waiver of reexecution of an oath or declaration, may be an appropriate remedy. The requirement for an oath or declaration is maintained in § 1.48(a) notwithstanding its replacement in § 1.324 for issued patents by a statement of agreement or lack of disagreement with the requested change in view of the need to satisfy the duty of disclosure requirement in a pending application that is set forth in a § 1.63 oath or declaration.

Section 1.48(a)(4) is amended to include a citation to § 3.73(b) to clarify the requirements for submitting a written consent of assignee, which is subject to the requirement under § 3.73(b),and to delete the reference to an application involved in an interference, which is being moved to § 1.48(a). Section 1.48(a)(4) is also amended to clarify that the assignee required to submit its written consent is only the existing assignee of the original named inventors at the time the petition is filed and not any party that would become an assignee based on the grant of the inventorship correction.

Section 1.48(b) is also amended to remove the requirement that a petition thereunder be diligently filed. The applicability of a rejection under 35 U.S.C. 102(f) or (g) against an application with the wrong inventorship set forth therein and any patent that would issue thereon is sufficient motivation for prompt correction of the inventorship without the need for a separate requirement for diligence.

Section 1.48(b) is amended to have a clarifying reference to § 1.634 added for instances when inventorship correction is necessary during an interference.

Comment 13: A comment noted that the literal wording of § 1.48(b) permits correction thereunder only where the correct inventors were named on filing thereby excluding correction under § 1.48(b) where an incorrect inventorship was named on filing that was subsequently corrected under § 1.48(a) and, subsequent to the correction prosecution of the application, required additional correction under § 1.48(b).

Response: The comment is accepted and § 1.48(b) has been modified to delete "when filed" after "nonprovisional application" for clarification purposes. Additionally, the term "originally" in the first sentence of paragraph (b) has been replaced with "currently."

Section 1.48(c) is amended so that a petition thereunder no longer needs to meet the current requirements of § 1.48(a), which are also changed. A statement from each inventor being added that the inventorship amendment is necessitated by amendment of the claims and that the error occurred without deceptive intent is required under § 1.48(c)(1) rather than the previous requirement of a statement from each original named inventor. The previous requirements under § 1.48(a) for an oath or declaration, the written consent of an assignee and the written consent of any assignee are retained, but are now separately set forth in §§ 1.48 paragraphs (c)(2) through (c)(4). The particular circumstances of a petition under this paragraph, adding an inventor due to an amendment of the claims that incorporates material attributable to the inventor to be added, is seen to be indicative of a lack of deceptive intent in the original naming of inventors. Accordingly, all that must be averred to is that an amendment of the claims has necessitated correction of the inventorship and that the inventorship error existing in view of the claim amendment occurred without deceptive intent. The previous requirement for diligence in filing the petition based on an amendment to the claims is not retained as applicants have the right, prior to final rejection or allowance, to determine when particular subject matter is to be claimed. Applicants should note that any petition under § 1.48 submitted after allowance is subject to the requirements

of § 1.312, and a petition submitted after final rejection is not entered as a matter of right.

Section 1.48(c)(2) is amended to clarify the availability of §§ 1.42, 1.43 and 1.47 in meeting the requirement for an executed oath or declaration under § 1.63. Section 1.47 is only applicable to the person to be added as an inventor. For those persons already having an executed oath or declaration under § 1.63, a petition under § 1.183, requesting waiver of reexecution of an oath or declaration, may be an appropriate remedy.

Section 1.48(c)(4) is amended to clarify that the assignee required to submit its written consent is only the existing assignee of the original named inventors at the time the petition is filed and not any party that would become an assignee based on the grant of the inventorship correction. A citation to § 3.73(b) is presented.

Section 1.48(d) is amended by addition of "their part" to replace "the part of the actual inventor or inventors" and of "omitted" to replace "actual" to require statements from the inventors to be added rather than from all the actual inventors so as to comply with 35 U.S.C.116.

Section 1.48(d)(1) is also clarified to specify that the error to be addressed is the inventorship error. It is not expected that the party filing a provisional application will normally need to correct an error in inventorship under this paragraph by adding an inventor therein except when necessary under § 1.78 to establish an overlap of inventorship with a continuing application.

Section 1.48(d)(1) is also amended to remove the requirement that the statement be verified in accordance with the change to §§ 1.4(d)(2) and 10.18.

Section 1.48(e)(1) is amended to replace a requirement in provisional applications that the required statement be one "of facts" directed towards "establishing that the error" being corrected "occurred without deceptive intention," requiring only a statement that the inventorship error occurred without deceptive intent. Paragraph (e)(1) is also amended to remove the requirement that the statement be verified in accordance with the change to §§ 1.4(d)(2) and 10.18. It is not expected that the party filing a provisional application would need to file a petition under this paragraph since the application will go abandoned by operation of law (35 U.S.C. 111(b)(5)), and the need to delete an inventor will not affect the overlap of inventorship needed to claim priority under § 1.78(a)(3) for any subsequently filed nonprovisional application.

Section 1.48(e)(3) is amended to clarify that the assignee required to submit its written consent is only the prior existing assignee before correction of the inventorship is granted and not any party that would become an assignee based on the grant of the inventorship correction. A reference to § 3.73(b) is added.

Section 1.48(f) is added to provide that the later filing of an executed oath or declaration (or cover sheet (§ 1.51(c)(1)) in a provisional application) during the pendency of the application would act to correct the inventorship without a specific petition for such correction and will be used to further process the application notwithstanding any inventorship or other identification name earlier presented.

Section 1.48(g) is added to specifically recognize that the Office may require such other information as may be deemed appropriate under the particular circumstances surrounding a correction of the inventorship.

Section 1.51: Section 1.51, paragraphs (a)(1) and (a)(2), are re-written as § 1.51, paragraphs(b) and (c), respectively, and § 1.51(b) is re-written as § 1.51(d). Section 1.51(c) covering the use of an authorization to charge a deposit account is removed as unnecessary in view of § 1.25(b).

No comments were received regarding the proposed change to § 1.51.

Section 1.52: Section 1.52, paragraphs (a) and (d), are amended to remove the requirement that the translation be verified in accordance with the change to §§ 1.4(d)(2) and 10.18. Section 1.52, paragraph (c), is amended to remove the reference to §§ 1.123 through 1.125 to: (1) reflect a transfer of material from §§ 1.123 and 1.124 to § 1.121; (2) further clarify that § 1.125 is not a vehicle amendment of an application; and (3) to clarify that alterations to application papers may be made on, as well as before, the signing of the oath or declaration. Section 1.52, paragraphs (a) and (d), are also amended to clarify the need for a statement that the translation being offered is an accurate translation, as in § 1.69(b).

Comment 14: Two comments were received asking whether the attorney can sign the statement that the translation is accurate, and how much firsthand knowledge does a practitioner need to know that the translation is accurate.

Response: The Office will accept a statement that the translation is accurate from any party. However, any party signing such statement must keep in mind the averments that are made under §§ 1.4(d) and 10.18. The actual firsthand knowledge needed by a practitioner is that amount of knowledge to comply with the averments in §§ 1.4(d) and 10.18.

Comment 15: A comment questioned whether there is any difference between the previous language of "verified translation" and the present language of "accurate translation."

Response: The previous language was directed at a verification that the translation is accurate. A verification requirement is now unnecessary due to the amendments to §§ 1.4(d) and 10.18. Thus, § 1.52(d) is amended to include the more direct term "accurate."

Section 1.53: Section 1.53 is amended to include headings for each paragraph for purposes of clarity.

Section 1.53(a) is amended to state that "[a]ny papers received in the Patent and Trademark Office which purport to be an application for a patent will be assigned an application number for identification purposes." That is, the Office will refer to papers purporting to be an application for a patent as an "application" and assign such "application" an application number for identification purposes. This reference, however, does not imply that such papers meet the requirements in § 1.53(b) to be accorded a filing date or constitute an "application" within the meaning of 35 U.S.C. 111.

Section 1.53(b) is amended to provide that: (1) the filing date of an application for patent filed under § 1.53(b) is the date on which a specification as prescribed by 35 U.S.C. 112 containing a description pursuant to § 1.71 and at least one claim pursuant to § 1.75, and any drawing required by § 1.81(a) are filed in the Office; (2) no new matter may be introduced into an application after its filing date; (3) a continuation or divisional application filed by all or by fewer than all of the inventors named in a prior nonprovisional application may be filed under § 1.53(b) or (d); and (4) a continuation or divisional application naming an inventor not named in the prior nonprovisional application or a continuation-in-part application must be filed under § 1.53(b).

Section 1.53(c) is amended to provide for provisional applications (formerly provided for in § 1.53(b)(2)). Section 1.53(c) includes the language of former § 1.53(b)(2), with certain changes for purposes of clarity. Section 1.53(c)(i), for example, includes language requiring either the provisional application cover sheet required by § 1.51(c)(1) or a cover letter identifying the application as a provisional application. The cover letter may be an application transmittal letter or some other paper identifying the accompanying papers as a provisional application.

Section 1.53(d) is amended to provide for continued prosecution applications. Section 1.53(d)(1) provides that a continuation or divisional application, but not a continuation-in-part, of a prior nonprovisional application may be filed as a continued prosecution application under § 1.53(d), subject to the conditions specified in paragraph (d)(1)(i) and (d)(1)(ii). That is, an application under § 1.53(d) cannot be a continuation-in-part application, and the prior application cannot be a provisional application.

Section 1.53(d)(1)(i) specifies that the prior application be either: (1) complete as defined by § 1.51(b) and filed on or after June 8, 1995; or (2) the national stage of an international

application in compliance with 35 U.S.C. 371 and filed on or after June 8, 1995. The phrase "prior" application in § 1.53(d)(1) means the application immediately prior to the continued prosecution application under § 1.53(d), in that a continued prosecution application under § 1.53(d) may claim the benefit under 35 U.S.C. 120, 121, or 365(c) of applications filed prior to June 8, 1995 so long as the application that is immediately prior to the continued prosecution application under § 1.53(d) was filed on or after June 8, 1995.

Section 1.53(d)(1)(ii) specifies that the application under § 1.53(d) be filed before the earliest of: (1) payment of the issue fee on the prior application, unless a petition under § 1.313(b)(5) is granted in the prior application; (2) abandonment of the prior application; or (3) termination of proceedings on the prior application.

Section 1.53(d)(2) provides that the filing date of a continued prosecution application is the date on which a request on a separate paper for an application under § 1.53(d) is filed. That is, a request for an application under § 1.53(d) cannot be submitted within papers filed for another purpose (*e.g.*, the filing of a "conditional" request for a continued prosecution application within an amendment after final for the prior application is an improper request for a continued prosecution application under § 1.53(d)).

In addition, a "conditional" request for a continued prosecution application will not be permitted. Any "conditional" request for a continued prosecution application submitted (as a separate paper) with an amendment after final in an application will be treated as an unconditional request for a continued prosecution application of such application. This will result (by operation of § 1.53(d)(2)(v)) in the abandonment of such (prior) application, and (if so instructed in the request for a continued prosecution application) the amendment after final in the prior application will be treated as a preliminary amendment in the continued prosecution application.

Section 1.53(d)(2) further provides that an application filed under § 1.53(d): (1) must identify the prior application (§ 1.53(d)(i)); (2) discloses and claims only subject matter disclosed in the prior application (*i.e.*, is a continuation or divisional, but not a continuation-in-part) (§ 1.53(d)(1)(ii)); (3) names as inventors the same inventors named in the prior application on the date the application under § 1.53(d) was filed, except as provided in § 1.53(d)(4) (§ 1.53(d)(2)(iii)); (4) includes the request for an application under § 1.53(d), will utilize the file jacket and contents of the prior application, including the specification, drawings and oath or declaration, from the prior application to constitute the new application, and will be assigned the application number of the prior application for identification purposes (§ 1.53(d)(2)(iv)); and (5) is a request to expressly abandon the prior application as of the filing date of the request for an application under § 1.53(d) (§ 1.53(d)(2)(v)).

Section 1.53(d)(3) provides that the filing fee for a continued prosecution application filed under § 1.53(d) is: (1) the basic filing fee as set forth in § 1.16; and (2) any additional § 1.16 fee due based on the number of claims remaining in the application after entry of any amendment accompanying the request for an application under § 1.53(d) and entry of any amendments under § 1.116 not entered in the prior application which applicant has requested to be entered in the continued prosecution application. *See* 35 U.S.C. 41(a)(1)-(4).

Section 1.53(d)(4) provides that an application filed under § 1.53(d) may be filed by fewer than all the inventors named in the prior application, provided that the request for an application under § 1.53(d) when filed is accompanied by a statement requesting deletion of the name or names of the person or persons who are not inventors of the invention being claimed in the new application, and that no person may be named as an inventor in an application filed under § 1.53(d) who was not named as an inventor in the prior application on the date the application under § 1.53(d) was filed, except by way of a petition under § 1.48. Thus, an application under § 1.53(d) must name as inventors either the same as (§ 1.53(d)(2)(iii)) or fewer than all of (§ 1.53(d)(4)) the inventors named in the prior application. A request for an application under § 1.53(d) purporting to name as an inventor a person not named as an inventor in the prior application (even if accompanied by a new oath or declaration under § 1.63 listing that person as an inventor) will be treated as naming the same inventors named in the prior application (§ 1.53(d)(2)(iii)).

Section 1.53(d)(5) provides that: (1) any new change must be made in the form of an amendment to the prior application; (2) no amendment in an application under § 1.53(d) (a continued prosecution application) may introduce new matter or matter that would have been new matter in the prior application; and (3) any new specification filed with the request for an application under § 1.53(d) will not be considered part of the original application papers, but will be treated as a substitute specification in accordance with § 1.125. Pursuant to the provisions of § 1.53(d)(5), where applicant desires entry of an amendment in the application under § 1.53(d) that was previously denied entry under § 1.116 in the prior application, the applicant must request its entry (and pay any additional claims fee required by § 1.53(d)(3)(ii)) in the application under § 1.53(d) prior to action by the Office in the application under § 1.53(d). Any amendment submitted with the request for an application under § 1.53(d) that seeks to add matter that would have been new matter in the prior application will be objected to under § 1.53(d), and the applicant will be required to cancel the subject matter that would have been new matter in the prior application.

Section 1.53(d)(6) provides that the filing of a continued prosecution application under § 1.53(d) will be construed to include a waiver of confidentiality by the applicant under 35 U.S.C. 122 to the extent that any member of the public who is entitled under the provisions of § 1.14 to access to, copies of, or information concerning either the prior application or any continuing application filed under the provisions of this paragraph may be given similar access to, copies of, or similar information concerning, the other application(s) in the application file.

Section 1.53(d)(7) provides that a request for an application under § 1.53(d) is a specific reference under 35 U.S.C. 120 to every application assigned the application number identified in such request, and that no amendment in a continued prosecution application under § 1.53(d) shall delete this specific reference to any prior application. That is, other than the identification of the prior application in the request required by § 1.53(d) for a continued prosecution application, a continued prosecution application needs no further identification of or reference to the prior application (or any prior application assigned the application number of such application under § 1.53(d)) under 35 U.S.C. 120 and § 1.78(a)(2).

Section 1.53(d)(8) provides that in addition to identifying the application number of the prior application, applicant is urged to furnish in the request for an application under § 1.53(d) the following information relating to the prior application to the best of his or her ability: (1) title of invention; (2) name of applicant(s); and (3) correspondence address.

Section 1.53(d)(9) provides that: (1) envelopes containing only requests and fees for filing an application under § 1.53(d) should be marked "Box CPA" and (2) requests for an application under § 1.53(d) filed by facsimile transmission should be clearly marked "Box CPA."

Section 1.53(e)(1) provides that if an application deposited under § 1.53 paragraphs (b), (c), or (d) does not meet the respective requirements in § 1.53 paragraphs (b), (c), or (d) to be entitled to a filing date, applicant will be so notified, if a correspondence address has been provided, and given a time period within which to correct the filing error.

Section 1.53(e)(2) provides that: (1) any request for review of a notification pursuant to § 1.53(e)(1), or a notification that the original application papers lack a portion of the specification or drawing(s), must be by way of a petition pursuant to § 1.53(e); (2) any petition under § 1.53(e) must be accompanied by the fee set forth in § 1.17(i) in an application filed under § 1.53 paragraphs (b) or (d), and the fee set forth in § 1.17(q) in an application filed under § 1.53(c); and (3) in the absence of a timely (§ 1.181(f)) petition pursuant to this paragraph, the filing date of an application in which the applicant was notified of a filing error pursuant to paragraph (e)(1) of this section will be the date the filing error is corrected.

Section 1.53(e)(3) provides that if an applicant is notified of

a filing error pursuant to § 1.53(e)(1), but fails to correct the filing error within the given time period or otherwise timely (§ 1.181(f)) take action pursuant to § 1.53(e)(2), proceedings in the application will be considered terminated, and that where proceedings in an application are terminated pursuant to § 1.53(e)(3), the application may be disposed of, and any filing fees, less the handling fee set forth in § 1.21(n), will be refunded.

Section 1.53(f) is amended to include the language of former § 1.53(d)(1) and to provide that the oath or declaration required for a continuation or divisional application under § 1.53(b) may be a copy of the executed oath or declaration filed in the prior application (under § 1.63(d)).

Section 1.53 paragraphs (g), (h), (i), and (j) are added and include the language of former § 1.53 paragraphs (d)(2), (e)(1), (e)(2), and (f), respectively.

Comment 16: The majority of the comments supported the deletion of §§ 1.60 and 1.62 in favor of the proposed amendment to § 1.53.

Response: The Office is deleting §§ 1.60 and 1.62 in favor of an amended § 1.53.

Comment 17: Several comments suggested that the Office adopt a continued prosecution procedure for applications filed on or after June 8, 1995 similar to the practice set forth in § 1.129(a), rather than the continued prosecution application practice set forth in § 1.53(d).

Response: Section 532(a)(2)(A) of Pub. L. 103-465 provides specific authorization for the practice set forth in § 1.129(a). There is currently no statutory authority for the Office to simply charge the patent fees set forth in 35 U.S.C. 41(a) for further examination of an application. 35 U.S.C. 41(d) would authorize the Office to further examine an application for a fee that recovers the estimated average cost to the Office of such further examination; however, as 35 U.S.C. 41(h) is applicable only to fees under 35 U.S.C. 41(a) and (b), the Office would not be authorized to provide a small entity reduction in regard to such fee. Thus, the only mechanism by which the Office may provide further examination for a fee to which the small entity reduction is applicable is *via* a continuing application.

Section 209 of H.R. 3460, 104th Cong., 2d Sess. (1996), would have provided statutory authority for the further reexamination of an application for a fee to which the small entity reduction was applicable. Section 209 of H.R. 400, 105th Cong., 1st Sess. (1997), if enacted, will provide statutory authority for the further reexamination of an application for a fee to which the small entity reduction will be applicable.

Comment 18: One comment stated that the combination of §§ 1.53, 1.60, and 1.62 into a single § 1.53 was complex and confusing. Another comment suggested that § 1.53 be split into a number of sections, or that headings be used in § 1.53 in the manner that headings are used in §§ 1.84 and 1.96.

Response: Placing the provisions of § 1.53 into multiple sections, rather than multiple paragraphs of a single section, would not result in a simplification of its provisions. The Office considers it appropriate to place the filing provisions concerning all applications (nonprovisional, provisional, and continued prosecution) into a single section to reduce the confusion as to the filing requirements for any application for patent. Section 1.53 as adopted includes headings in each paragraph of § 1.53 to indicate the subject to which each of these paragraphs pertains.

Comment 19: One comment suggested amending § 1.53 to require applicants to indicate changes to the disclosure in a continuation or divisional application.

Response: The suggestion is not adopted. The Office did not propose to amend § 1.53 to require applicants to indicate changes to the disclosure in any continuing application. Thus, adopting a change to impose this additional burden on an applicant is not considered appropriate in this Final Rule.

Comment 20: One comment suggested that the Office permit applicants to file a statement requesting deletion of an inventor in a continuation or divisional application any time prior to or coincident with the mailing of an issue fee payment. The comment questioned whether the time period in § 1.53(e)(1) addresses this issue.

Response: Unless a statement requesting the deletion of the names of the person or persons who are not inventors in the continuation or divisional application accompanies the copy of the executed oath or declaration submitted in accordance with § 1.63(d) in an application filed pursuant to § 1.53(b), or accompanies the request for an application under § 1.53(d) in an application filed pursuant to § 1.53(d), the inventorship of the continuation or divisional application filed under § 1.53(b) using a copy of the oath or declaration of the prior application pursuant to § 1.63(d) or filed under § 1.53(d) will be considered identical to that in the prior application, and correction of the inventorship (if appropriate) must be by way of § 1.48. Identification of the inventorship is necessary to the examination of an application (*e.g.*, 35 U.S.C. 102(f) and (g)). As such, the Office must require identification of the inventorship prior to examination of an application.

Section 1.53(e)(1) applies in those instances in which papers filed as an application under § 1.53(b), (c), or (d) do not meet the respective requirements of § 1.53(b), (c), or (d) to be entitled to a filing date. Submitting an oath or declaration is not a filing date issue, and naming the inventors is no longer a filing date issue. Thus, the provisions of § 1.53(e) do not apply to the filing of a statement requesting deletion of an inventor in a continuation or divisional application.

Comment 21: One comment questioned whether § 1.53(d) applies only to applications filed on or after June 8, 1995, and questioned whether § 1.53(d) should be made applicable to pending applications filed prior to June 8, 1995. The comment also questioned the relationship between § 1.129(a) and § 1.53(d).

Response: Section § 1.53(d), by its terms, permits the filing of a continuation or divisional thereunder of only a nonprovisional application that, *inter alia*, is either: (1) complete as defined by § 1.51(b) and filed on or after June 8, 1995 or; (2) resulted from entry into the national stage of an international application in compliance with 35 U.S.C. 371 filed on or after June 8, 1995. While § 1.53(d) and § 1.129(a) both provide for the continued prosecution of an application, these sections are distinct in that they apply to a virtually mutually exclusive class of applications and have separate requirements (*e.g.*, a request for a § 1.53(d) application may be filed subsequent to the filing of an appeal brief, so long as the request is filed before the earliest of: (1) payment of the issue fee on the prior application, unless a petition under § 1.313(b)(5) is granted in the prior application; (2) abandonment of the prior application; or (3) termination of proceedings on the prior application).

Comment 22: One comment suggested that the rules of practice permit the execution of copies of an oath or declaration by fewer than all of the inventors, without cross-reference to the other copies to facilitate contemporaneous executions by geographically separated inventors.

Response: The suggestion is not adopted. Section 1.63(a)(3) requires that an oath (or declaration), *inter alia*, identify each inventor. The rules of practice permit inventors to execute separate oaths (or declarations), so long as each oath (or declaration) sets forth all of the inventors (the necessary cross-reference). That is, § 1.63(a)(3) prohibits the execution of separate oaths (or declarations) in which each oath (or declaration) sets forth only the name of the executing inventor. An amendment to the rules of practice to permit an inventor to execute an oath or declaration that does not set forth each inventor would not only lead to confusion as to the inventorship of an application, but would be inconsistent with the requirement in 35 U.S.C. 115 that the applicant make an oath (or declaration) that the applicant believes himself (or herself) to be the original and first inventor of the subject matter for which a patent is sought, as the oaths or declarations would conflict as to the inventorship of the application.

Comment 23: Several comments suggested that the statement required under 35 U.S.C. 120 in a continued prosecution application will be confusing as the continued prosecution application will have the same application number as the prior application. One comment indicated that this will cause confusion: (1) as to which application is being referenced in a 35 U.S.C. 120 statement in the divisional application when a divisional application under § 1.53(b) and a continued prosecution application filed under § 1.53(d) are filed from the same prior application; and (2) in docketing applications as most commercially available software identify applications by application number. Another comment questioned what sentence was required pursuant to § 1.78(a)(2) in a continued prosecution application.

Response: 35 U.S.C. 120 provides that an application may obtain the benefit of the filing date of an earlier filed application if, *inter alia*, the application "contains or is amended to contain a specific reference to the earlier filed application." Section 1.78(a) requires that this specific reference be in the first sentence of the specification and identify each earlier filed application by application number or international application number and international filing date and relationship of the applications. Thus, while a "specific reference to the earlier filed application" is a requirement of statute (35 U.S.C. 120), the particulars of this specific reference (by application number, filing date, and relationship) is a requirement of regulation (§ 1.78(a)), not the patent statute.

The purpose of the "specific reference" requirement of 35 U.S.C. 120 is to provide notice to the public of the filing date upon which a patentee may rely to support the validity of the patent:

> [35 U.S.C. 120] embodies an important public policy. The information required to be disclosed is information that would enable a person searching the records of the Patent Office to determine with a minimum of effort the exact filing date upon which a patent applicant is relying to support the validity of his application or the validity of a patent issued on the basis of one of a series of applications. In cases such as this, in which two or more applications have been filed and the validity of a patent rests upon the filing date of an application other than that upon which the patent was issued, a person, even if he had conducted a search of the Patent Office records, could unwittingly subject himself to exactly this type of infringement suit unless the later application adequately put him on notice that the applicant was relying upon a filing date different from that stated in the later application.
>
> *Sampson v. Ampex Corp.*, 463 F.2d 1042, 1045, 174 USPQ 417, 419 (2d Cir. 1972); *see also Sticker Indus. Supply Corp. v. Blaw-Knox Co.*, 405 F.2d 90, 93, 160 USPQ 177, 179(7th Cir. 1968) ("Congress may well have thought that [35 U.S.C.] 120 was necessary to eliminate the burden on the public to engage in long and expensive search of previous applications in order to determine the filing date of a later patent . . . . The inventor is the person best suited to understand the relation of his applications, and it is no hardship to require him to disclose this information").

To reduce the delay in processing a continued prosecution application, the Office will maintain in its records (*e.g.*, in the Patent Application Locating and Monitoring (PALM) records for an application) for identification purposes the application number and filing date of the prior application. Thus, in a continued prosecution application, the application number of the continued prosecution application will be the application number of the prior application, and the filing date indicated on any patent issuing from a continued prosecution application will be the filing date of the prior application (or, in a chain of continued prosecution applications, the filing date of the application immediately preceding the first continued prosecution application in the chain). In addition, as a continued prosecution application will use the file wrapper of the prior application, the prior application will be available upon inspection of the continued prosecution application.

Unless excepted from § 1.78(a)(2), the first sentence of a continued prosecution application would consist of a reference to that application as a continuation or divisional of an application having the identical application number and the effective filing date of (the filing date to be printed on any patent issuing from) the continued prosecution application. Such a sentence would provide no useful information to the public.

Therefore, § 1.53(d)(7) as adopted provides that a request for an application under § 1.53(d) is a specific reference under 35 U.S.C. 120 to every application assigned the application number identified in such request, and § 1.78(a)(2) as adopted provides that the request for a continued prosecution application under § 1.53(d) is the specific reference under 35 U.S.C. 120 to the prior application. That is, the continued prosecution application includes the request for an application under § 1.53(d) (§ 1.53(d)(2)(iv)), and the recitation of the application number of the prior application in such request (as required by § 1.53(d)) is the "specific reference to the earlier filed application" required by 35 U.S.C. 120. No further amendment to the specification is required by 35 U.S.C. 120 or § 1.78(a) for a continued prosecution application for such continued prosecution application to contain the required specific reference to the prior application, as well as any other application assigned the application number of the prior application (*e.g.*, in instances in which a continued prosecution application is the last in a chain of continued prosecution applications).

Where an application claims a benefit under 35 U.S.C. 120 of a chain of applications, the application must make a reference to the first (earliest) application and every intermediate application. *See Sampson*, 463 F.2d at 1044-45, 174 USPQ at 418-19; *Sticker Indus. Supply Corp.*, 405 F.2d at 93, 160 USPQ at 179; *Hovlid v. Asari*, 305 F.2d 747, 751, 134 USPQ162, 165 (9th Cir. 1962); *see also* MPEP 201.11. In addition, every intermediate application must also make a reference to the first (earliest) application and every application after the first application and before such intermediate application.

In the situation in which there is a chain of continued prosecution applications, each continued prosecution application in the chain will, by operation of § 1.53(d)(7), contain the required specific reference to its immediate prior application, as well as every other application assigned the application number identified in such request. Put simply, a specific reference to a continued prosecution application by application number and filing date will constitute a specific reference to: (1) the non-continued prosecution application originally assigned such application number (the prior application as to the first continued prosecution application in the chain); and (2) every continued prosecution application assigned the application number of such non-continued prosecution application.

Where the non-continued prosecution application originally assigned such application number itself claims the benefit of a prior application or applications under 35 U.S.C. 120, 121, or 365(c), § 1.78(a)(2) continues to require that such application contain in its first sentence a reference to any such prior application(s). As a continued prosecution application uses the specification of the prior application, such a specific reference in the prior application (as to the continued prosecution application) will constitute such a specific reference in the continued prosecution application, as well as every continued prosecution application in the event that there is a chain of continued prosecution applications.

Where an applicant in an application filed under § 1.53(b) seeks to claim the benefit of an application filed under § 1.53(d) under 35 U.S.C. 120 or 121 (as a continuation, divisional, or continuation-in-part), § 1.78(a)(2) requires a reference to the continued prosecution application by application number in the first sentence of such application. Section 1.78(a)(2) has been amended to also provide that "[t]he identification of an application by application number under this section is the specific reference required by 35 U.S.C. 120 to every application assigned that application number." Thus, where a referenced continued prosecution application is in a chain of continued prosecution applications, this reference will constitute a reference under 35 U.S.C. 120 and § 1.78(a)(2) to every continued prosecution application in the chain as well as the non-continued prosecution application originally assigned such application number.

Therefore, regardless of whether an application is filed under § 1.53(b) or (d), a claim under 35 U.S.C. 120 to the benefit of a continued prosecution application is, by operation of § 1.53(d)(7) and § 1.78(a)(2), a claim to every application assigned the application number of such continued prosecution application. In addition, applicants will not be permitted to choose to delete such a claim as to certain applications assigned that application number (*e.g.*, for patent term purposes).

Finally, while it is recognized that using a common application

number (and file wrapper) for a continued prosecution application and its prior application (which may also be a continued prosecution application) will necessitate docketing modifications (as well as the Office's PALM system), the burden of such modifications is outweighed by the benefits that will result from the elimination of the initial processing of such applications.

Comment 24: One comment suggested that the phrase "now refiled" be used in lieu of "now abandoned" to reflect the status of the prior application.

Response: Under 35 U.S.C. 120, the status of an application is one of three conditions: (1) pending; (2) patented; or (3) abandoned. *See In re Morganroth*, 6 USPQ2d 1802, 1803 (Comm'r Pat. 1988). As the filing of a continued prosecution application under § 1.53(d) operates to expressly abandon the prior application under § 1.53(d)(2)(v), the status of the prior application is appropriately designated as "abandoned."

Comment 25: Several comments suggested that the proposed continued prosecution application practice be made applicable in instances in which the prior application was filed prior to June 8, 1995, to expedite the prosecution of such applications.

Response: Permitting the continued prosecution application practice to be applicable in instances in which the prior application was filed prior to June 8, 1995, would result in confusion as to whether the patent issuing from the continued prosecution application is entitled to the provisions of 35 U.S.C. 154(c). As the continued prosecution application practice was not in effect prior to June 8, 1995, no patent issuing from a continued prosecution application is entitled to the provisions of 35 U.S.C. 154(c).

As discussed *supra*, the application number of a continued prosecution application will be the application number of the prior application, and the filing date indicated on any patent issuing from a continued prosecution application will be the filing date of the prior application (or, in a chain of continued prosecution applications, the filing date of the application immediately preceding the first continued prosecution application in the chain). Thus, any patent issuing from a continued prosecution application, where the prior application was filed prior to June 8, 1995, will indicate that the filing date of the application for that patent was prior to June 8, 1995, which will confuse the public (and possible the patentee) into believing that such patent is entitled to the provisions of 35 U.S.C. 154(c).

The Office has implemented § 532(a)(2)(A) of Pub. L. 103-465 in § 1.129(a) to conclude the examination of applications pending at least two years as of June 8, 1995, taking into account any reference made in such application to any earlier filed application under 35 U.S.C. 120, 121, and 365(c). Further examination of any application may be obtained *via* the filing of a continuing application under § 1.53(b). Requiring applications filed prior to June 8, 1995, that are not eligible for the transitional procedure set forth in § 1.129(a) to obtain further examination *via* the filing of a continuing application under § 1.53(b) is a reasonable requirement to avoid confusion as to whether a patent issuing from a continued prosecution (§ 1.53(d)) application is entitled to the provisions of 35 U.S.C. 154(c).

Comment 26: One comment suggested that the phrase "most immediate prior national application" rather than "prior application" was confusing. The comment further stated that if the prior application was one filed under § 1.62, there is no copy in that complete application of the (oath or) declaration filed in the application under § 1.62.

Response: The phrase "most immediate prior national application for which priority is claimed under 35 U.S.C. 120, 121 or 365(c)" is changed to "prior application." An application under §§ 1.53(d), 1.60, or 1.62 must ultimately be a continuing application of an application filed under § 1.53(b). Where the prior application is an application under § 1.60, the oath or declaration is the copy of the oath or declaration from the prior application *vis-à-vis* the application under § 1.60 submitted in accordance with § 1.60(b)(2). Where the prior application is an application under §§ 1.62 or 1.53(d), the oath or declaration is the oath or declaration from the prior application *vis-à-vis* the application under §§ 1.62 or 1.53(d). Where there is a chain of applications under §§ 1.62 or 1.53(d) preceding the prior application to an application under § 1.53(d), the oath or declaration of the prior application will be the oath or declaration of the application under §§ 1.53 or 1.60 immediately preceding the chain of applications under §§ 1.62 or 1.53(d), as each application in the chain of applications under §§ 1.62 or 1.53(d) utilizes the oath or declaration of the prior application.

Comment 27: One comment suggested that applications filed under § 1.53(d) should be taken up as amended applications, rather than as newly filed applications.

Response: The comment implies that taking up a continued prosecution application as an amended application may result in the examiner acting on the application in a more timely manner than if the application were accounted for as a new application. The matter is under consideration along with other administrative issues, and a decision shall be made in due course.

Comment 28: One comment suggested that § 1.129(a) be amended so as not to be limited to applications under final rejection, such that an applicant in an application in which a notice of allowance under § 1.311 has been mailed may obtain entry of an information disclosure statement without regard to the requirements of § 1.97(d).

Response: The Notice of Proposed Rulemaking did not propose to amend § 1.129(a). While the language of § 532(a)(2)(A) of Pub. L. 103-465 does not expressly exclude the further examination of an application that has been allowed (as opposed to an application under a final rejection), § 102(d) of Pub. L. 103-465 provides that "[t]he statement of administrative action approved by the Congress under section 101(a) shall be regarded as an authoritative expression by the United States concerning the interpretation and application of the Uruguay Round Agreements and this Act in any judicial proceeding in which a question arises concerning such interpretation or application." The statement of administrative action specifies that such further examination is to facilitate the completion of prosecution of applications pending before the Office, and to permit applicants to present a submission after the Office has issued a final rejection on an application. *See* H.R. Rep. 826(i), 103rd Cong., 2nd Sess. 1005-06, *reprinted* in 1984 U.S.C.C.A.N. 3773, 4298.

Upon mailing of a notice of allowance under § 1.311, prosecution of an application before the Office is concluded. The proposed amendment to obtain further examination pursuant to § 1.129(a) after allowance would nullify (rather than facilitate) the completion of prosecution of the above-identified application, and, as such, would be inconsistent with the purpose for the provisions of § 532(a)(2)(A) of Pub. L. 103-465.

Comment 29: One comment questioned how the filing of a continued prosecution application would result in less delay than the filing of a continuing application under § 1.53(b), as a continued prosecution application would be subject to preexamination processing delays.

Response: The Office will not issue a new filing receipt for a continued prosecution application under § 1.53(d). *See* § 1.54(b). By not issuing a filing receipt for a continued prosecution application, the Office will be able to perform the preexamination of any continued prosecution application in the examining group to which the prior application was assigned. Likewise, § 1.6(d) has been amended to permit an applicant to file a continued prosecution application under § 1.53(d) by facsimile, and the use of this means of filing a continued prosecution application will avoid the delay inherent in routing an application (or any paper) from the mailroom to the appropriate examining group. These provisions will enable the Office to process a continued prosecution application in the manner that a submission under § 1.129(a) is processed.

Comment 30: One comment questioned whether the filing date of a continued prosecution application is the filing date for determining patent term, or is significant only in establishing copendency. Another comment questioned what filing date was relevant for determining patent term.

Response: Notwithstanding that a continued prosecution application is assigned the application number of the prior application, the filing date of the continued prosecution application is the date on which the request for such continued prosecution application was filed (§ 1.53(d)). While the filing date of the continued prosecution application is relevant to establishing the copendency required by 35 U.S.C. 120 and § 1.78(a) between the continuedprosecution application and the prior application, the filing date of a continued prosecution application will *never* be relevant to the term under 35 U.S.C. 154(b) of any patent issuing from the continued prosecution application.

Any continued prosecution application under § 1.53(d) will be filed on or after June 8, 1995, and will claim the benefit of an earlier application as a continuation or divisional application. Section 1.53(d)(7) specifically provides that:

A request for an application under this paragraph is the specific reference required by 35 U.S.C. 120 to every application assigned the application number identified in such request. No amendment in an application under this paragraph shall delete this specific reference to any prior application.

Thus, an application under § 1.53(d) cannot be amended to delete the specific reference to the prior application, as well as the specific reference to any application to which the prior application contains a specific reference under 35 U.S.C. 120, 121, and 365(c). As an application under § 1.53(d) will also contain a specific reference to at least one other application under 35 U.S.C. 120, 121, and 365(c), the expiration date under 35 U.S.C. 154(b)(2) of any patent issuing from the application under § 1.53(d) will be based upon the filing date of the prior application (or the earliest application to which the prior application contains a specific reference under 35 U.S.C. 120, 121, and 365(c)).

Comment 31: One comment argued that the Office should address not only the filing requirements for continuing applications, but also the cause of the filing of continuing applications. The comment specifically argued that the current second action final practice should be reevaluated as an applicant no longer has an incentive to delay the prosecution of an application due to Pub. L. 103-465.

Response: The suggestion is being taken under advisement as part of a comprehensive effort by the Office to reengineer the entire patent process. However, it should be noted that any changes to the current second action final practice to provide additional examination of an application prior to a final Office action would necessitate a corresponding increase in patent fees.

Comment 32: One comment suggested that the Office simply eliminate the "true copy" requirement of § 1.60, rather than add new provisions permitting the use of a copy of the oath or declaration of a prior application. The comment also suggested that the Office simply amend § 1.62 to eliminate the requirement that the Office assign a new application number to the application, rather than add a new § 1.53(d).

Response: The amendments to § 1.53 do not simply make minor changes to §§ 1.60 and 1.62. Sections 1.60 and 1.62 are anachronisms that have outlived their usefulness. A significant number of applications filed under § 1.60 do not meet the requirements of § 1.60 (and, as such are improper), but would be proper under § 1.53 (in the absence of a reference to § 1.60). The elimination of § 1.60 will result in a reduction in the Office's burden in treating and the applicant's burden in correcting these improper applications under § 1.60, as such applications would generally have been proper applications if filed under § 1.53 (without a reference to § 1.60). Section 1.63(d) retains most of the benefits of § 1.60, but eliminatesthe filing "traps" of § 1.60.

Section 1.62 practice also causes problems concerning its prohibition against including a new or substitute specification, and its permitting the filing of a continuation-in-part. To avoid continued prosecution application practice under § 1.53(d) being confused with the former file-wrapper-continuation practice under § 1.62, the Office has deemed it advisable to use a new § 1.53(d) rather than § 1.62 in regard to continued prosecution application practice.

Comment 33: One comment stated that the Office should anticipate the filing of applications containing a reference to § 1.60 or § 1.62 for some period.

Response: That applications containing a reference to §§ 1.60 or 1.62 will continue to be filed has been anticipated. The treatment of such applications is discussed *infra* with respect to the elimination of §§ 1.60 and 1.62.

Comment 34: One comment stated that the safeguard in § 1.60 concerning the filing of an application lacking all of the pages of specification or sheets of drawings of the prior application has not been retained in § 1.53(b). The comment suggested that § 1.53 contain a presumption that a continuation or divisional be presumed, absent evidence to the contrary, to be the filing of an application identical to the prior application.

Response: The Court of Customs and Patent Appeals (CCPA) has held that a mere reference to another application, patent, or publication is not an incorporation of anything therein into the application containing such reference. *See In re de Seversky*, 474 F.2d 671, 177 USPQ144 (CCPA 1973); *see also Dart Industries v. Banner*, 636 F.2d 684, 207 USPQ 273 (CCPA1980) (related decision). These decisions relied upon *In re Lund*, 376 F.2d 982, 153 USPQ625 (CCPA 1967), which considered the incorporation by reference issue in the context of whether a prior art patent adequately incorporated by reference a prior application. The court, in *Lund*, specifically stated:

There is little in the term "continuation-in-part" which would suggest to the reader of the patent that a disclosure of the nature of Example 2 is present in the earlier application and should be considered a part of the patent specification. Thus, we cannot agree that the subject matter of claim 3 is tacitly "described" in the Margerison patent within the meaning of § 102(e).

Id. at 989, 153 USPQ 631-32 (footnote discussing the definition of "continuation-in-part" as set forth in MPEP 201.08 omitted). While the holdings in *Dart Industries, de Seversky* and *Lund* appear to be based upon the definitions of the various categories of continuing applications set forth in the MPEP (and thus could be changed by a revision to the MPEP), the Office is not at this time inclined to disturb settled law in this area.

Nevertheless, an applicant may incorporate by reference the prior application by including, in the continuing application-as-filed, a statement that such specifically enumerated prior application or applications are "hereby incorporated herein by reference." The inclusion of this incorporation by reference of the prior application(s) will permit an applicant to amend the continuing application to include any subject matter in such prior application(s), without the need for a petition.

Section 1.54: Section 1.54(b) is amended to add the phrase "unless the application is an application filed under § 1.53(d)." To minimize application processing delays in applications filed under § 1.53(d), such applications will not be processed by the Office of Initial Patent Examination as new applications.

No comments were received regarding the proposed change to § 1.54.

Section 1.55: Section 1.55(a) is amended to remove the requirement that the statement be verified in accordance with the change to §§ 1.4(d)(2) and 10.18.

No comments were received regarding the proposed change to § 1.55.

Section 1.59: Section 1.59 is amended: (1) by revising the title to indicate that expungement of information from an application file would come under this section; (2) by revising the existing paragraph and designating it as paragraph (a)(1); and (3) by adding paragraphs (a)(2),(b) and (c). Section 1.59(a)(1) retains the general prohibition on the return of information submitted in an application, but no longer limits that prohibition to an application that has been accorded a filing date under § 1.53. The portion of the paragraph relating to the Office furnishing copies of application papers has been shifted to new paragraph (c). Section 1.59(a)(2) makes explicit that information, forming part of the original disclosure (*i.e.*, written specification including the claims, drawings, and any preliminary amendment

specifically incorporated into an executed oath or declaration under §§ 1.63 and 1.175) will not be expunged from the application file.

Section 1.59(b) provides an exception to the general prohibition of paragraph (a) on the expungement and return of information and would allow for such when it is established to the satisfaction of the Commissioner that the requested expungement and return is appropriate. Section 1.59(b) covers the current practice set forth in MPEP 724.05 where information is submitted as part of an information disclosure statement and the submitted information has initially been identified as trade secret, proprietary, and/or subject to a protective order and where applicant may file a petition for its expungement and return that will be granted upon a determination by the examiner that the information is not material to patentability. Any such petition should be submitted in reply to an Office action closing prosecution so that the examiner can make a determination of materiality based on a closed record. Any petition submitted earlier than close of prosecution may be dismissed as premature or returned unacted upon. In the event pending legislation for pre-grant publication of applications, which provides public access to the application file, is enacted, then the timing of petition submissions under this section will be reconsidered.

Petitions to expunge were formerly considered under § 1.182, with the Office of Petitions consulting with the examiner on the materiality of the information at issue prior to rendering a decision. A possible result of the amendment to § 1.59 would be to have petitions under § 1.59 to expunge simply decided by the examiner who determines the materiality of the information.

Comment 35: One comment suggested that petitions to expunge under § 1.59 should be decided by Group Directors or officials in the Office of Petitions, rather than by examiners. The comment argued that any individual examiner would decide such a petition so rarely that it would be difficult to produce uniform and consistent decisions.

Response: The preamble has been amended to reflect that a possible result of the rule change is to have petitions under § 1.59 decided by the examiners. The heart of most petitions to expunge is a determination as to whether the material sought to be expunged is material to examination, a matter that is now referred to examiners prior to a decision on the petition. Given the major role examiners now play in expungement matters, it is not clear why examiners would be rendering inconsistent decisions, particularly as so many other matters are routinely assigned to examiners including petitions under § 1.48. Nevertheless, the comment is not germane to § 1.59 as proposed (or adopted), but concerns the internal Office delegation of such petitions for consideration. Moreover, a petition to expunge a part of the original disclosure would have to be filed under § 1.183 and would continue to be decided in the Office of Petitions.

Comment 36: A comment in requesting some examples of things that may be expunged asked whether a design code listing as an appendix in an application may be expunged.

Response: The standard set forth in paragraph (b) of § 1.59 permits information other than what is enumerated in paragraph (a) of the section to be expunged if it is established to the satisfaction of the Commissioner that the return of the information is appropriate. The types of information and rationales why the information may be returned are varied and will be evaluated on a case-by-case basis with the basic inquiry being whether the information is material to examination of the application. However, to the extent that an appendix to a specification of an application is considered part of the original disclosure it cannot be expunged from the file under § 1.59(a)(2).

Section 1.59(b) also covers information that was unintentionally submitted in an application, provided that: (1) the Office can effect such return prior to the issuance of any patent on the application in issue; (2) it is stated that the information submitted was unintentionally submitted and the failure to obtain its return would cause irreparable harm to the party who submitted the information or to the party in interest on whose behalf the information was submitted; (3) the information has not otherwise been made public; (4) there is a commitment on the part of the petitioner to retain such information for the period of any patent with regard to which such information is submitted; and (5) it is established to the satisfaction of the Commissioner that the information to be returned is not material information under § 1.56. A request to return information that has not been clearly identified as information that may be later subject to such a request by marking and placement in a separate sealed envelope or container shall be treated on a case-by-case basis. It should be noted that the Office intends to start electronic scanning of all papers filed in an application, and the practicality of expungement from the electronic file created by a scanning procedure is not as yet determinable. Applicants should also note that unidentified information that is a trade secret, proprietary, or subject to a protective order that is submitted in an Information Disclosure Statement may inadvertently be placed in an Office prior art search file by the examiner due to the lack of such identification and may not be retrievable.

Section 1.59(b) also covers the situation where an unintended heading has been placed on papers so that they are present in an incorrect application file. In such a situation, a petition should request return of the papers rather than transfer of the papers to the correct application file. The grant of such a petition will be governed by the factors enumerated above in regard to the unintentional submission of information. Where the Office can determine the correct application file that the papers were actually intended for, based on identifying information in the heading of the papers (*e.g.*, Application number, filing date, title of invention and inventor(s) name(s)), the Office will transfer the papers to the correct application file for which they were intended without the need of a petition.

Section 1.59(c) retains the practice that copies of application papers will be furnished by the Office upon request and payment of the cost for supplying such copies.

Section 1.60: Section 1.60 is removed and reserved.

Section 1.60 is now unnecessary due to the amendment to § 1.63(d) to expressly permit the filing in a continuation or divisional application using a copy of the oath or declaration filed in the prior application, and to provide (§ 1.63(d)(2)) for the filing of a continuation or divisional application by all or by fewer than all the inventors named in a prior application.

See comments relating to § 1.53.

Section 1.62: Section 1.62 is removed and reserved.

Section 1.62 is unnecessary due to the addition of § 1.53(d) to permit the filing of a continued prosecution application.

It is anticipated that applications purporting to be applications filed under §§ 1.60 or 1.62 will be filed until the deletion of §§ 1.60 and 1.62 become well known among patent practitioners. An application purporting to be an application filed under § 1.60 will simply be treated as a new application filed under § 1.53 (*i.e.*, the reference to § 1.60 will simply be ignored).

Applications purporting to be an application filed under § 1.62 will be treated as continued prosecution applications under § 1.53(d), and those applications that do not meet the requirements of § 1.53(d) (*e.g.*, continuation-in-part applications or continuations or divisional of applications filed before June 8, 1995) will be treated as improper continued prosecution applications under § 1.53(d). Such an improper application under § 1.53(d) may be accepted and treated as a proper application under § 1.53(b) by way of petition under § 1.53(e) (and submission of the $130 fee pursuant to § 1.17(i)).

A petition under § 1.53(e) to accept and treat an improper application under § 1.53(d) as a proper application under § 1.53(b) must include: (1) the $130 petition fee; (2) a true copy of the complete application designated as the prior application in the purported § 1.62 application papers; (3) any amendments entered in the prior application; and (4) any amendments submitted but not entered in the prior application and directed to be entered in the purported § 1.62 application papers. In an application purporting to be a continuation or divisional application under § 1.62, the true copy of the prior application will constitute the original disclosure of the application under § 1.53(b), and any amendments entered in the prior application or not entered in the prior application but directed to be entered in the purported § 1.62 application papers and submitted with the § 1.53(e) petition will be entered in the application under § 1.53(b) and considered by the examiner for new matter under 35 U.S.C. 112, ¶1, and 132. In an application purporting to be a continuation-in-part application under § 1.62, the true copy of the prior application, any amendments entered in the prior application or not entered in the prior application but directed to be entered in the purported § 1.62 application papers and submitted with the § 1.53(e) petition, and any preliminary amendment submitted with the purported § 1.62 application will constitute the original disclosure of the application under § 1.53(b).

See comments relating to § 1.53.

Section 1.63: Section 1.63(a)(3) is amended to require the post office address to appear in the oath or declaration and to have the requirement from § 1.41(a) for the full names of the inventors placed therein.

Comment 37: Two comments raised the issue regarding the continued requirement that both a post office address and a residence be supplied and indicated that the residence is not required by statute, the post office address is sufficient for communication purposes, and that the burden of submitting both far outweighs the infrequent need to contact any particular inventor by passing counsel so that the residence alone should be sufficient.

Response: Under the proposed comment the applicants would still be required to submit either the residence or post office address. To request that they also supply the other or state that both are the same is not seen to be a significant burden as the information is to be supplied on the oath or declaration form that they must sign anyway and spaces can be provided to ensure that the information is supplied. While neither the residence nor the post office address are statutory requirements, the Office requires this information for the applicant's benefit. As more than one person may have the same name, a person's name is often not sufficient to provide a unique identification of the inventor. Thus, the Office also requires an inventor's residence (which is not required to be sufficiently detailed to suffice as a post office address) to specifically identify the person(s) named in the oath or declaration as the inventor(s), which is a common practice for legal documents. The post office address is also required in the event that the Office finds it necessary to directly contact the inventor(s). It is not uncommon for an inventor to revoke a power of attorney or authorization of agent in a paper providing no address for future correspondence from the Office. Also, the Office will need to directly contact the inventor if the Office is notified of the death of a sole attorney or agent of record (MPEP 406).

Section 1.63(d) is amended to: (1) relocate its current language in a new § 1.63(e); and (2) provide that a newly executed oath or declaration is not required under § 1.51(b)(2) and 1.53(f) in a continuation or divisional application filed by all or by fewer than all of the inventors named in a prior nonprovisional application containing an oath or declaration as prescribed by § 1.63, provided that a copy of the executed oath or declaration filed in the prior application is submitted for the continuation or divisional application and the specification and drawings filed in the continuation or divisional application contain no matter that would have been new matter in the prior application. The copy of the oath or declaration must show the signature of the inventor(s) or contain an indication thereon that the oath or declaration was signed (*e.g.*, the notation "/s/" on the line provided for the signature).

A continuation or divisional application may be filed under 35 U.S.C. 111(a) using the procedures set forth in § 1.53(b), by providing either: (1) a copy of the prior application, including a copy of the oath or declaration in such prior application, as filed; or (2) a new specification and drawings and a copy of the oath or declaration as filed in the prior application so long as no matter is included in the new specification and drawings that would have been new matter in the prior application. The specification and drawings of a continuation or divisional application is not limited to a reproduction or "true copy" of the prior application, but may be revised for clarity or contextual purposes *vis-à-vis* the prior application in the manner that an applicant may file a substitute specification (§ 1.125) or amend the drawings of an application so long as it does not result in the introduction of new matter. Of course, 35 U.S.C. 115 requires that a supplemental oath or declaration meeting the requirements of § 1.63 be filed in the continuation or divisional application, if a claim is allowed in the continuation or divisional application which is drawn to subject matter originally shown or described in the prior application but not substantially embraced in the statement of the invention or claims originally presented in the prior application as filed. *See* § 1.67(b).

The patent statute and rules of practice do not require that an oath or declaration include a date of execution, and the Examining Corps has been directed not to object to an oath or declaration as lacking either a recent date of execution or any date of execution. The applicant's duty of candor and good faith including compliance with the duty of disclosure requirements of § 1.56 is continuous and applies to the continuing application.

A new application containing a copy of an oath or declaration under § 1.63 referring to an attached specification is indistinguishable from a continuation or divisional application containing a copy of an oath or declaration from a prior application submitted pursuant to § 1.63(d). Unless an application is submitted with a statement that the application is a continuation or divisional application (§ 1.78(a)(2)), the Office will process such application as a new non-continuing application. Applicants are advised to clearly designate any continuation or divisional application as such to avoid the issuance of a filing receipt that does not indicate that the application is a continuation or divisional.

To continue the practice in § 1.60(b)(4) of permitting the filing of a continuation or divisional application by all or by fewer than all of the inventors named in a prior application without a newly executed oath or declaration, new § 1.63(d)(2) provides that the copy of the oath or declaration submitted for a continuation or divisional application under § 1.63(d) must be accompanied by a statement from applicant, counsel for applicant or other authorized party requesting the deletion of the names of the person or persons who are not inventors in the continuation or divisional application. Where the continuation or divisional application and copy of the oath or declaration from the prior application is filed without a statement from an authorized party requesting deletion of the names of any person or persons named in the prior application, the continuation or divisional application will be treated as naming as inventors the person or persons named in the copy of the executed oath or declaration from the prior application. Accordingly, if a petition under § 1.48(a) or (c) was granted in the prior application, an oath or declaration filed in a continuation or divisional application pursuant to § 1.63(d) should be the oath or declaration also executed by the added inventor(s). For situations where an inventor or inventors are to be added in a continuation or divisional application, see § 1.63(d)(5).

The statement requesting the deletion of the names of the person or persons who are not inventors in the continuation or divisional application must be signed by person(s) authorized pursuant to § 1.33(b) to sign an amendment in the continuation or divisional application.

Section 1.63(d)(3) provides for the situation in which the executed oath or declaration of which a copy is submitted for a continuation or divisional application was originally filed in a prior application accorded status under § 1.47. Section 1.63(d)(3)(i) requires a copy of any decision granting a petition to accord § 1.47 status to such application, unless each nonsigning inventor(s) or legal representative (pursuant to §§ 1.42 or 1.43) has filed an oath or declaration to join in an application of which the continuation or divisional application claims a benefit under 35 U.S.C. 120, 121 or 365(c). Where a nonsigning inventor or legal representative (pursuant to §§ 1.42 or 1.43) subsequently joins in any application of which the continuation or divisional application claims a benefit under 35 U.S.C. 120, 121 or 365(c), § 1.63(d)(3)(ii) also requires a copy of any oath or declaration filed by an inventor or legal representative to subsequently join in such application.

Section 1.63(d)(4) provides that where the power of attorney (or authorization of agent) or correspondence address was changed

during the prosecution of the prior application, the change in power of attorney (or authorization of agent) or correspondence address must be identified in the continuation or divisional application, or the Office may not recognize in the continuation or divisional application the change of power of attorney (or authorization of agent) or correspondence address during the prosecution of the prior application.

A newly executed oath or declaration will continue to be required in a continuation or divisional application naming an inventor not named in the prior application, or a continuation-in-part application, and § 1.63(d)(5) expressly states that a newly executed oath or declaration must be filed in a continuation or divisional application naming an inventor not named in the prior application.

New § 1.63(e) provides that a newly executed oath or declaration must be filed in a continuation-in-part application, which application may name all, more, or fewer than all of the inventors named in the prior application, and includes the language relocated from former § 1.63(d) concerning an oath or declaration in a continuation-in-part application.

Comment 38: One comment suggested that the practice of permitting the use of an executed oath or declaration of a prior application creates a trap for the unwary in the situation in which an applicant believes in error that no new matter has been added in the "continuation" application and does not file a new declaration.

Response: The situation outlined in the comment is less of a trap for the unwary than the situation in which an applicant files a substitute specification and believes in error that no new matter has been added, in that the error in the "continuation" may be corrected by redesignation of the application as a continuation-in-part and the filing of a new oath or declaration. Nevertheless, it remains the applicant's responsibility to review any substitute specification or new specification submitted for a continuation application to determine that it contains no new matter. *See* MPEP 608.01(q). An applicant is advised to simply file a continuing application with a newly executed oath or declaration when it is questionable as to whether the continuing application adds material that would have been new matter if presented in the prior application.

Comment 39: One comment suggested that the option of submitting "a copy of an unexecuted oath or declaration, and a statement that the copy is a true copy of the oath or declaration that was subsequently executed and filed to complete . . . the most immediate prior national application for which priority is claimed under 35 U.S.C. 120, 121 or 365(c)" was strange at best as the applicant or representative should have a copy of the oath or declaration that was filed to complete the prior application or could obtain one from Office records.

Response: The suggestion is adopted. Section 1.63(d) as adopted provides that: "[a] newly executed oath or declaration is not required under § 1.51(b)(2) and § 1.53(f) in a continuation or divisional application filed by all or by fewer than all of the inventors named in a prior nonprovisional application containing an oath or declaration as prescribed by paragraphs (a) through (c) of this section, provided that a copy of the executed oath or declaration filed in the prior application is submitted for the continuation or divisional application."

Comment 40: One comment questioned whether § 1.53 (or § 1.63) is consistent with § 1.48 as to whether the oath or declaration filed in a continuing application adding an inventor must be executed by all of the inventors, or just the added inventor.

Response: The oath or declaration filed in a continuing application adding an inventor or a continuation-in-part application must name and be executed by all of the inventors. Sections 1.48 and 1.63(e) are consistent in this regard.

Comment 41: One comment questioned whether, in a continuation or divisional application following a chain of continuation or divisional applications, the copy of the executed oath or declaration may be a copy of the oath or declaration filed in the immediate prior application (which may itself be a copy of an oath or declaration from a prior application), or must be a direct copy of the originally executed oath or declaration.

Response: Section 1.63(d) requires a copy of the oath or declaration from the prior application. In instances in which the oath or declaration filed in the prior application is itself a copy of an oath or declaration from a prior application, either a copy of the copy of the oath or declaration in the prior application or a direct copy of the original oath or declaration is acceptable, as both are a copy of the oath or declaration in the prior application. *See* § 1.4(d)(1)(ii).

Section 1.67: Section 1.67 paragraph (b) is amended to change "§ 1.53(d)(1)" to "§ 1.53(f)" for consistency with § 1.53.

No comments were received regarding § 1.67.

Section 1.69: Section 1.69(b) is amended to remove the requirement that the translation be verified in accordance with the change to §§ 1.4(d)(2) and 10.18. Section 1.69(b) is also amended to clarify the need for a statement that the translation being offered is an accurate translation, as in § 1.52 paragraphs (a) and (d).

Two comments were received in regard to § 1.69 that also raised similar issues in regard to § 1.52, which comments are treated with § 1.52.

Section 1.78: Section 1.78(a)(1) is amended to remove the references to §§ 1.60 and 1.62 in view of the deletion of §§ 1.60 and 1.62, and to include a reference to an "international application entitled to a filing date in accordance with PCT Article 11 and designating the United States of America." Section 1.78(a)(2) is amended for consistency with the changes to § 1.53, and to provide that "[t]he identification of an application by application number under this section is the specific reference required by 35 U.S.C. 120 to every application assigned that application number."

No comments were received regarding the proposed change to § 1.78.

Section 1.84: Section 1.84(b) is amended by removing references to the filing of black and white photographs in design applications as unnecessary in view of the reference in § 1.152 to § 1.84(b). Section 1.84 paragraphs (c) and (g) are amended for consistency in regard to the English equivalents (5/8 inch.) for 1.5 cm.

No adverse comments were received regarding the proposed change to § 1.84.

Section 1.91: The title of § 1.91 is amended to clarify that a certain type of material is not generally admitted in the file record by substitution of "admitted" for "required."

Section 1.91 is also amended to clarify the type of material that is not generally admitted into the file record of an application. Section 1.91(a) specifically requires a petition (with the fee set forth in § 1.17(i)) including an appropriate showing why entry of the model or exhibit into the file record is necessary to demonstrate patentability, unless the model or exhibit: (1) substantially conforms with § 1.52 or § 1.84; or (2) was required by the Office.

Section 1.91 is also amended to state that a model, working model or other physical exhibit, whose submission by applicants is generally not permitted, may be required by the Office if deemed necessary for any purpose in the examination of the application. This language is moved from § 1.92.

Comment 42: Several adverse comments were received expressing concern that the addition of the term "exhibits" to the bar against admission of models, unless specifically required by the Office, would prevent applicants from making their best possible case for patentability, and that exhibits would be interpreted by the Office as barring two-dimensional as well as three-dimensional exhibits.

Response: The preamble of the proposed rule indicated that the change to the rule is in the nature of a clarification and not a change in practice. Further clarification has been added to the rule by reference to § 1.52 or § 1.84 and to the instant discussion of the rule to indicate that the use of the term "exhibits" is in the nature of other three-dimensional models, such as videos, and will not bar two-dimensional exhibits currently being accepted. Additionally, a petition route has been added to the rule that would permit entry of three-dimensional models or exhibits where they are necessary to establish patentability. Section 1.91 is also amended to expressly provide for the filing of a petition thereunder (rather than to require the filing of a petition under § 1.183) such that an applicant may gain entry of a model or exhibit, without a showing of an extraordinary situation where justice requires grant of the relief sought.

The fact that a three-dimensional model or exhibit will not generally be entered in the record absent an appropriate showing does not prevent an applicant from showing the exhibit to the examiner for purposes of clarifying the examiner's understanding of the invention and reducing the model or exhibit to two-dimensional conformance with § 1.52 or § 1.84 for entry of that reduction to the record (which issues are separate and distinct from the questions as to whether the later presented material was originally required for an understanding of the invention and its subsequent addition being subject to a new matter objection under 35 U.S.C.132).

Due to the unusual difficulties of storage for three-dimensional materials and little demonstrated need for their presence in the file record over what would be provided for *via* petition under § 1.91, it is not seen to be appropriate to permit unrestricted entry of three-dimensional exhibits in the file record.

Section 1.92: Section 1.92 is removed and reserved and the language transferred to § 1.91(b) for improved contextual purposes.

No comments were received regarding the proposed change to § 1.92.

Section 1.97: Sections 1.97(c) through (e) are amended by replacement of "certification" by "statement" (see comments relating to § 1.4(d)), and by clarifying the current use of "statement" by the terms "information disclosure."

Section 1.97(e)(2) is further amended to replace "or" by "and" to require that no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the statement, after making reasonable inquiry, no item of information contained in the information disclosure was known to any individual designated in § 1.56(c) more than three months prior to the filing of the information disclosure statement. The use of "and" rather than "or" is in keeping with the intent of the rule as expressed in the MPEP609(B)(2)(ii), that the conjunction be conjunctive rather than disjunctive. The mere absence of an item of information from a foreign patent office communication was clearly not intended to represent an opportunity to delay the submission of the item when known more than three months prior to the filing of an information disclosure statement to an individual having a duty of disclosure under § 1.56.

No comments were received regarding the proposed change to § 1.97.

Section 1.101: Section 1.101 is removed and reserved as relating to internal Office instructions.

Comment 43: A number of comments opposed the deletion of the rules that solely govern Office procedure. The reasons given for this opposition are: (1) the Office should subject its procedures to the notice and comment provisions of the Administrative Procedure Act (APA); (2) the inclusion of such procedures in the rules of practice imparts the force and effect of law to such procedures; (3) the greater deference given to procedures set forth in the rules of practice, rather than the MPEP, during court action.

Response: The CCPA has held that applicants before the Office are entitled to rely not onlyon the patent statute and rules of practice, but on the provisions of the MPEP, during the prosecution of an application for patent. *See In re Kaghan,* 387 F.2d 398, 401, 156 USPQ130, 132 (CCPA 1967). Thus, there is in practice little, if any, benefit to applicants before the Office in having the Office procedure set forth in the rules of practice, rather than the MPEP. In any event, no comment pointed to any specific decision, and the Office is not aware of any decision, in which the result turned on the inclusion of Office procedure in the rules of practice (rather than simply in the MPEP).

Nevertheless, in view of the concern expressed in the comments as to the rules of practice setting forth the fundamentals of the examination of an application, the Office will retain the substance of §§ 1.104 and 1.105 in the rules of practice. *See In re Phillips,* 608 F.2d 879,883 n.6, 203 USPQ 971, 974 n.6 (CCPA 1979) (although irrelevant to the result, the Office was criticized for piecemeal examination contrary to §§ 1.104 and 1.105). The substance of §§ 1.104, 1.105, 1.106, 1.107, and 1.109, however, will be combined into § 1.104 paragraphs (a)-(e).

The Office will also retain § 1.351 in the rules of practice, as it has been relied upon as the notice that the Office will provide concerning changes to the rules of practice in 37 CFR Part 1. *See In re Nielson,* 816 F.2d 1567, 1571, 2 USPQ2d 1525, 1527 (Fed. Cir. 1987). Finally, the Office will retain § 1.181 paragraphs (d), (e), and (g) to avoid confusing petition practice, and § 1.325 to avoid confusion as to the requirements for correction of a patent.

The Office, however, will delete §§ 1.101, 1.108, 1.122, 1.184, 1.318, and 1.352 from 37 CFR Part 1. The procedures set forth in §§ 1.101, 1.122, 1.184 and 1.318 do not provide meaningful safeguards to applicants (*e.g.*, § 1.101 does not ensure or give an applicant the right to examination of an application within any reasonably specific time frame). The proscription in § 1.108 is simply an administrative instruction based upon the fact that, unless otherwise publicly available, abandoned applications do not constitute prior art under 35 U.S.C. 102 (and thus 103). Finally, as former § 1.352 included a "whenever required by law" prerequisite, it provided no independent requirement that the Office publish proposed rule changes for comment.

Section 1.102: Section 1.102(a) is amended to remove the requirement that the showing be verified in accordance with the change to §§ 1.4(d)(2) and 10.18.

No comments were received regarding the proposed change to § 1.102.

Section 1.103: Section 1.103(a) is amended by replacement of "response" with "reply" in accordance with the change to § 1.111.

No comments were received regarding the proposed change to § 1.103.

Section 1.104: Section 1.104 is amended to include paragraphs (a) through (e) including the substance of former §§ 1.104, 1.105, 1.106, 1.107, and 1.109. The re-writing of §§ 1.104, 1.105, 1.106, 1.107, and 1.109 as § 1.104(a) through (e) involves no change in substance.

See comment relating to § 1.101.

Section 1.105: Section 1.105 is removed and reserved as the subject matter was transferred to § 1.104(b).

See comment relating to § 1.101.

Section 1.106: Section 1.106 is removed and reserved as the subject matter was transferred to § 1.104(c).

See comment relating to § 1.101.

Section 1.107: Section 1.107 is removed and reserved as the subject matter was transferred to § 1.104(d).

See comment relating to § 1.101.

Section 1.108: Section 1.108 is removed and reserved as relating to internal Office instructions.

See comment relating to § 1.101.

Section 1.109: Section 1.109 is removed and reserved as the subject matter was transferred to § 1.104(e).

See comment relating to § 1.101.

Section 1.111: Section 1.111 is amended to consistently refer

to a "reply" to an Office action. The prior section used the term "response" and "reply" in an inconsistent manner and created some confusion. Paragraph (b) of § 1.111 is also amended to explicitly recognize that a reply must be reduced to a writing which must point out the specific distinctions believed to render the claims, including any newly presented claims, patentable. It is noted that an examiner's amendment reducing a telephone interview to writing would comply with § 1.2.

Comment 44: One comment asked whether pointing out one distinction is sufficient or must applicant provide an exhaustive list of all distinctions. Additionally, inquiry is made as to whether it is sufficient to point out the impropriety of a rejection under 35 U.S.C. 102 that should have been a rejection under 35 U.S.C. 103, or must a rejection under 35 U.S.C. 103 be anticipated and answered.

Response: A distinction should be kept in mind between what is necessary for a reply to be considered sufficient to continue prosecution of the application and what will advance the application to issuance in the most efficient manner. While pointing out only one distinction, such as why a rejection under 35 U.S.C. 102 is inappropriate, would comply with the requirements of § 1.111, advancement of the prosecution of the application would best be served by pointing out all possible distinctions, so that if the argument for one distinction is not persuasive, another may be. Similarly, anticipation of and argument against a rejection under 35 U.S.C. 103 where a rejection under 35 U.S.C. 102 should have been made under 35 U.S.C. 103 could possibly prevent making of the rejection under 35 U.S.C. 103 by the examiner and an earlier issuance of the application thereby preserving patent term under 35 U.S.C. 154 as amended by Pub. L. 103-465.

Comment 45: Three comments pointed to instances where a reply would not necessarily require that distinctions be pointed out, such as: (1) where context and arguments presented make the distinctions clear beyond doubt; (2) where a *prima facie* case has not been established or motivation for modification of a reference is lacking; (3) a secondary reference is from a nonanalogous art improperly combined; or (4) no reference has been applied.

Response: The comment has been adopted to the extent that the paragraph (b) of the rule has been amended to refer to "any" rather than "the" applied references. Any argument that would make the distinctions clear beyond doubt would seem to require identification of the distinctions therein. Where a reply contains an argument that motivation for a modification of a reference made by an examiner does not exist, or that a nonanalogous secondary reference has been improperly combined, the identification of the claim element involved and the particular factual basis that makes the modification or combination relating to that claim element inappropriate are necessary elements of a reply. That an applicant considers a rejection, objection, or other requirement in an Office action to be inappropriate does not relieve the applicant of the burden under 35 U.S.C. 133 of prosecuting the application to avoid abandonment.

Comment 46: A comment suggested that the requirement for supplying claim distinctions for a newly presented claim is at odds with the Office's burden in the first instance of explaining any objection or rejection of an applicant's claim, and that the existing requirement that an applicant distinctly and specifically point out the errors in the examiner's action and reply to every ground of objection and rejection are sufficient without the added language. Another comment noted that it is believed that the rule already requires that specific distinctions be supplied and questions what new requirements are being added by that additional language.

Response: To the extent that the already existing language would require that claim distinctions be presented, the added language is seen to clarify what is required of an applicant in replying to an Office action and is not seen to be at odds with the Office's burdenin first going forward with a rejection of the claims. Once a claim is rejected, there is a duty on applicants under § 1.111 to provide an appropriate reply as defined therein for applicant to be entitled to reconsideration or further examination.

Section 1.112: Section 1.112 is amended to remove as unnecessary the statement that "any amendments after a second Office action must ordinarily be restricted to the rejection, objections or requirements made in the office action" to reflect actual practice, in which amendments after the second action need not be restricted to the rejection or the objections or requirements set forth in an Office action. The heading of § 1.112 is also amended to add "before final action" to clarify that such reconsideration does not apply after a final Office action.

No comments were received regarding the proposed change to § 1.112.

Section 1.113: Section 1.113(a) is amended to add "by the examiner" after "examination or consideration," change "objections to form" to "objections as to form" for clarity, and replace "response" with "reply" in accordance with the change to § 1.111.

Section 1.113(b) is amended to change "clearly stating the reasons therefor" to "clearly stating the reasons in support thereof" for clarity.

Comment 47: A number of comments argued that first action final practice should be eliminated without regard to an amendment to § 1.116 as: (1) 35 U.S.C. 132 does not authorize first action final practice; and (2) the filing fee paid in a continuing application should entitle an applicant to an examination and reexamination in the continuing application.

Response: The argument that 35 U.S.C. 132 does not authorize first action final practice has been considered by the Office and rejected in *In re Bogese,* 22 USPQ2d 1821 (Comm'r Pat. 1992). Specifically, continuing applications have historically been considered part of a continuous proceeding in regard to the prior application. *Id.* at 1827. First action final practice denies an applicant the delay inherent in an additional Office action in a continuation application, thus compelling the applicant to draft claims in a continuation application in view of the prosecution history of the parent application (*i.e.*, the rejections and prior art of record in the parent application), and thus make a *bona fide* effort to define the issues for appeal or allowance. *Id.* at 1824-25.

In addition, under the current patent fee structure, a significant portion of the Office's costs of examining patent applications is recovered through issue and maintenance fees. That is, the filing fees required by 35 U.S.C. 41(a)(1)-(4) and § 1.16 for an application do not cover the Office's full costs of examining that application pursuant to 35 U.S.C. 131 and 132. Therefore, the argument that first action final practice is inherently unfair in view of the filing fees paid by the applicant fails to appreciate the current patent fee structure.

Due to the overwhelming opposition to the proposed changes to § 1.116 to simplify after final practice, the proposed change to § 1.113 to eliminate first action final practice and the proposed changes to § 1.116 to simplify after final practice are not adopted in this Final Rule. The Office will give further consideration to the elimination of first action final practice.

Comment 48: One comment suggested that § 1.113 should be clarified to reflect the intent of the rule change that a first action final rejection not issue in a continuation application.

Response: The proposed change to § 1.113 to prohibit a first action final rejection is not being adopted.

Section 1.115: Section 1.115 has been removed and reserved, rather than amended to contain the material of former §§ 1.117 through 1.118, 1.123 and 1.124. The subject matter proposed to be included in § 1.115 has been transferred to § 1.121. The change does not constitute a change in substance; the material of the deleted sections has simply been rearranged and edited for clarity and contextual purposes in § 1.121. The reference in § 1.115(b)(2) relating to the rejection of claims containing new matter has not been retained in § 1.121 as unnecessary.

Comment 49: One comment recognizing that the subject matter of § 1.118 is transferred to § 1.115 (now § 1.121) noted that the particular material of the second and third sentences of paragraph (a) of § 1.118(a) was not so transferred and should be.

Response: While the exact language of the second and third sentences of paragraph (a) of § 1.118 was not transferred to 1.121 (§ 1.115 as originally proposed), the concept is retained in § 1.121, paragraphs (a)(6), (b)(5), and (c)(1), in condensed form.

Comment 50: One comment objected to the requirement of paragraph (d) of § 1.115 (now § 1.121) where a disclosure must be amended to secure correspondence between the claims, the specification and the drawings. Forcing the specification to parrot the language of new claims, where only new claims originally use a term not found in the original disclosure and in the original claims, is said to impose an undue burden on applicant and jeopardize the validity of all the claims if the new term is found to be new matter.

Response: The comment does not explain why a specification containing a later added expression subsequently found to contain new matter will adversely affect claims that do not contain that expression, particularly if a portion of the specification is retained that provides support for claims not containing that expression. Additionally, the requirement being criticized is not a new requirement but was material transferred from § 1.117. However, the comment was adopted in-part in that § 1.121, paragraphs (a)(5) and (b)(4), require only "substantial correspondence" between the claims, the remainder of the specification, and the drawings.

Comment 51: One comment suggested that the term "sketch" in paragraph (e) of § 1.115 (now § 1.121) be broadened to "drawing."

Response: Sections 1.121(a)(3)(ii) and 1.121(b)(3)(ii) recite sketch, which has been interpreted by the Office to include a copy. The use of sketch is seen to be the broader term in allowing a handwritten alteration of a copy of the previously submitted drawing to be done without the need for a color copy being obtained.

Comment 52: One comment suggested that paragraph (f) of § 1.115 (now § 1.121), requiring no interlineations to appear in a clause as finally presented, is inconsistent with the requirements of § 1.121 requiring brackets and underlining of the subject matter deleted and added.

Response: The comment was adopted by clarifying § 1.121(a)(iii) as adopted by reciting that the interlineation prohibition relates to previous amendments being depicted in a subsequent amendment, and to limit its applicability to applications other than reissue applications (thereby also excluding reexamination proceedings) in that all changes from the patent are required to be shown in reissue applications and reexamination proceedings.

Section 1.116: Section 1.116 is amended by adding the phrase "or appeal" to its heading. This change clarifies the current practice that paragraphs (b) and (c) apply to amendments filed after an appeal, regardless of whether the application was subject to a final rejection prior to the appeal.

Section 1.116(a) is also amended for clarity to limit amendments after a final rejection or other final action (§ 1.113) to those amendments cancelling claims or complying with any requirement of form set forth in a previous Office action, and replaces the phrase "any proceedings relative thereto" with "any related proceedings" for clarity. The amendment does not represent a change in practice under § 1.116(a) as was originally proposed, but merely a clarification of when an applicant is entitled to entry of an amendment under § 1.116(a).

Comment 53: Almost every comment relating to the proposed change to § 1.116 to limit entry of amendments after a final Office action based on simplification of issues for appeal opposed the change. The various rationales included: (1) a liberal practice by examiners in entering amendments after final rejection based on a willingness to engage in significant negotiations after final rejection; (2) an increased burden on the Board of Patent Appeals and Interferences (Board); (3) a loss of potential patent term under 35 U.S.C. 154 if refiling an application was routinely required; (4) a loss of clarity by applicant and the examiner of theissues involved, in that it is frequently only after the second action that the issues become clarified, particularly as counsel are not aware of the art that may actually be applied against the claims and therefore do not submit claims that can read over such art; (5) to the extent the need to enter amendments causes refiling of an application, greater resources from the Office are required as opposed to simply entering the amendment in the prior application; (6) there will be an increase in the requests for interviews after first action; (7) the change represents encouragement for examiners to cut down on papers entered particularly in view of the crediting system; and (8) the proposal is not helpful to applicant and is only a revenue generator.

Several alternative suggestions were made including: (1) a fee to have amendments after final entered as a matter of right; (2) discretion for examiners to enter any amendment should be explicitly stated in the rule; (3) consider substantive amendments if submitted at least one month in advance of the end of the reply period; (4) eliminate applicant's concern for expedited handling of § 1.116 amendments by having a new period for appealing or refiling; (5) entry of amendment to solely correct rejections under 35 U.S.C. 112, ¶2, should be permitted; (6) first after final submission permitted entry under simplification of issuesstandard and any subsequent submission would only be permitted under standard as proposed without simplification of issues available; (7) merging of a dependent claim into an independent claim ought to be explicitly permitted as a matter of right; (8) provide a standard of entry dependent upon good and sufficient reason as to why the amendment after final was not made earlier; (9) permit consideration of the amendment for allowable subject matter to save applicant cost of refiling for such determination; and (10) change should be linked with a prohibition on applying a new reference in a final rejection.

Response: In view of the issues raised and the alternative suggestions presented, it has been determined that further study is required. The comments have been adopted solely to the extent that the proposed change to delete simplification of issues for purpose of appeal, as a basis for entry of an amendment after final rejection, will not be implemented at this time.

Section 1.117: Section 1.117 is removed and reserved as the subject matter was transferred to § 1.121.

No comments were received regarding the proposed change to § 1.117.

Section 1.118: Section 1.118 is removed and reserved and its subject matter transferred to § 1.121.

See first comment related to § 1.115.

Section 1.119: Section 1.119 is removed and reserved as duplicative of the provisions of §§ 1.111 and 1.121.

No comments were received regarding the proposed change to § 1.119.

Section 1.121: Section 1.121, paragraphs (a) through (f), are replaced with paragraphs (a) through (c), which separately treat amendments in non-reissue nonprovisional applications (paragraph (a)), amendments in reissue applications (paragraph (b)), and amendments in reexamination proceedings (paragraph (c)). The intent of the changes is to retain amendment practice in regard to non-reissue applications prior to the changes proposed in the Notice of Proposed Rulemaking and to make final the changes in amendment practice in regard to reissue applications proposed in the Notice of Proposed Rulemaking, except for requiring copies of all claims as of the date of submission of an amendment and a constructive cancellation in their absence. Additionally, while retaining the previous amendment practice in non-reissue applications, the regulations have been clarified by deletion of §§ 1.115, 1.117 through 1.118, 1.123, and 1.124 and placement of subject matter thereof in § 1.121.

Comment 54: Most comments received on the proposed change in amendment practice as it relates to non-reissue applications to bring it into line with reissue and reexamination amendment practices were very negative. In particular, the proposed changes to present a complete copy of the claims when any amendment to the claims is made, and to hold a constructive cancellation for any claim copy not presented were alarming. However, similar comments were not received in regard to the

proposed changes to bring reissue and reexamination practice closer together.

Response: The comments were adopted in that the proposed changes, other than clarifications of current practice, will not be implemented now and further study will be undertaken to include suggestions presented in regard to this rule.

Comment 55: Several comments offered suggestions and requested clarifications: (1) whether this was an attempt to push the practice closer to PCT where substitute pages are used; (2) use of different markings such as strikeouts of word processors; (3) only requirecomplete copy of claims at issue; (4) only have a status listing of all claims not complete copy with each response; (5) continuations or divisions should be filed showing markups; (6) require only that new claims pages be substituted; (7) objection to the submission of a separate complete set of claims in addition to the amendments being made; (8) some instances separate set may be appropriate and not too much of a burden; and (9) there should beexception, liberal reinstatement, or rebuttable presumption for constructive cancellation if clerical omission.

Response: Paragraphs (a) and (b) of § 1.121 each separately treat amendment of the specification (paragraphs (a)(1) and (b)(1)), and of the claims (paragraphs (a)(2) and (b)(2)). In comparing amendment practice to the specification for non-reissue and reissue applications, all amendments in the reissue application are to be made relative to (*i.e., vis-à-vis*) the specification (including the claims) and drawings of the original patent as of the date of the filing of the reissue application. Changes are shown using underlining and bracketing relative to the patent specification. In addition, the entire paragraph of disclosure with the changes and the entire claim with the changes must be presented, in making the amendment. On the other hand, amendments in a non-reissue application are to be made relative to prior amendments (with underlining and bracketing in a reproduced claim reflecting changes made relative to the prior amendment), and insertions and deletions can be made without reproducing the entire paragraph of disclosure or the entire claim. Further (for a non-reissue application), in amending the text of the disclosure other than the claims, changes are not shown by underlining and bracketing, even where a paragraph of disclosure is reproduced.
